Notes: WSP – Wireless Service Platform

- The OEC 9900 comes with a device called the WSP which facilitates three capabilities:
 - 1) USB 2.0 mass storage; The USB functionality is write only, and saves images in .jpg/.bmp/.avi file formats. USB storage devices must be unencrypted and unprotected
 - 2) Automated sending of system log files to remote GE InSite 2.0 server: OEC joins GE Healthcare InSite 2.0 Remote Data Collection and Monitoring platform:
 - Also utilizes 128 bit Secure Sockets Layer (SSL) data encryption, HTTPS Port 443, and complies with your existing firewall rules and web proxies. Log files sent via the WSP do not contain patient information
 - 3) If purchased, Wireless DICOM. Wireless utilizes a Wireless LAN 802.11 b/g/n, 10/100MB device, runs a custom embedded Windows implementation, and currently supports WEP-64, WEP-128, WPA-PSK(TKIP), WPA2-PSK (AES-CCMP) security methods
