 **STERIS**

One size does not fit all. Whether you're short or tall, seated or standing, STERIS has an ergonomic workstation to meet your needs. With the risk of high cost and lost-time back injuries, it has become increasingly important to protect your workers from overexertion. We designed STERIS prep and pack workstations to facilitate a healthy posture, to organize your space, and to maximize your productivity.

You now have the option of four workstations based on your activity-level:

- > **Basic Worktable** – basic work surface option for wrapping sets. Available with electric or manual height adjust.
- > **ErgoStat** – deluxe option for assembling instrument sets and organization. Available with electric height adjust.
- > **Ultra Frame Single** – space saving option for assembling instrument sets and organization. Available with manual height adjust.

> **Ultra Frame Double** – positioned back-to-back for space savings; manual height adjust

> The “**Deluxe**” version of the ErgoStat and Ultra Frame can accommodate instrument tracking hardware, such as computers, flat-screen monitors, keyboards and scanners.

All prep and pack workstations are constructed with durable, easy-to-clean stainless steel surfaces. And, with a wide-variety of accessories, you can customize your table to best suit your workflow. Lastly, built-in wheels allow you to easily move the table where you want it, when you want it.

Prep and Pack Workstations are not built the same. Say goodbye to your old boring tables and upgrade to STERIS prep and pack workstations. Your employees will thank you!
