Memorandum 2011-003

6. Description of Efforts Made to ensure that offers are solicited from as many potential sources as deemed practicable: Any action to increase competition for the supplier of fire alarm control systems would cause an undue hardship on the Erie VA Medical Center, who has been making a conscious effort to standardize their fire control systems in the past in an effort to increase the control of all critical aspects of the fire alarm systems. The installation of a system which is not compatible to the present Notifier System would cause increased problems through false alarms or the risk of loss of life as a result of the lack of critical alarm if smoke or fire is not detected. There would be an increase in acquisition cost by having to purchase the front-end hardware/software and would still involve disjointed systems without integrity and an unmanageable Fire/Smoke Alarm System.
7. Determination by the Contracting Officer that the Anticipated Cost to the Government will be Fair and Reasonable: Cost will be extensively reviewed based on review of published prices by requesting activity.
8. Description of the Market Research Conducted and the Results, or a Statement of the Reasons Market Research Was Not Conducted: Further market research was not conducted based on same content provided in paragraph 6 above.
