## UROSKOP Omnia

---

Part No. / Product	Description
<b>UROSKOP Omnia, Left</b>	<p><b>Patient Table</b></p> <ul style="list-style-type: none"> <li>- Left-hand version of the basic unit</li> <li>- Height adjustable tilting table (+/-90°), cantilevered.</li> <li>- Table supports up 272 kg / 600 lbs of patient weight</li> <li>- Longitudinally traveling imaging system, independent of table position</li> <li>- Longitudinally and transversely traveling tabletop</li> <li>- Lateral profile rails for attachment of urological accessories</li> <li>- Motorized park position of the X-ray tube assembly with integrated patient grip</li> <li>- Very low, fixed sitting height of the patient during urodynamic examinations</li> <li>- Fast and easily removable, lightweight tabletop extension for the horizontal positioning of the patient's legs.</li> <li>- Two high-contrast 48 cm (19 inch) color TFT displays</li> </ul> <p><b>Workflow Support</b></p> <ul style="list-style-type: none"> <li>- Symmetrical access to the patient from all table sides for urologist and nurse</li> <li>- Unobstructed view from every working position thanks to the ergonomic swivel arm with freely positionable TFT displays</li> <li>- Defined position of the anesthetist in the room at the head end of the tabletop through symmetric patient access.</li> <li>- Low table position to facilitate easy and ergonomic patient transfer</li> <li>- Changes from the ideal patient transfer position to your preferred working position with just one push of a button</li> <li>- Motorized, removable grid</li> </ul> <p><b>The system is especially suitable for</b></p> <ul style="list-style-type: none"> <li>- Transurethral procedures (e.g. Ureterorenoscopy (URS), Double-J stent insertion, cystoscopy, transurethral resection of bladder tumor (TURB), transurethral resection of prostate (TURP))</li> <li>- Percutaneous urologic procedures (e.g. percutaneous nephrostomy (PCN), percutaneous nephrolitholapaxy (PCNL))</li> <li>- Diagnostic Urologic Procedures (e.g. Overview Imaging (KUB), Intravenous Pyelogram (IVP), retrograde Pyelography, ultrasound imaging)</li> <li>- Video Urodynamic Procedure, Micturation Cystourethrogram (MCU)</li> <li>- Laparoscopic procedures</li> <li>- Urological pediatric procedures</li> <li>- Non urologic procedures: e.g. ERCP (Endoscopic Retrograde Cholangiopancreatography)</li> </ul> <p><b>Flat panel detector</b></p> <ul style="list-style-type: none"> <li>- Dynamic Flat Detector with a size of 43 x 43 cm (17 x 17 inch) and a large field-of-view</li> <li>- Pixel size: 148 µm</li> <li>- Matrix size: 2,840 x 2,880 (8.2 million pixels)</li> <li>- Detail resolution: 3.4 LP/mm</li> <li>- Acquisition depth: 16 bits</li> </ul> <p><b>POLYDOROS F X-ray generator</b></p> <ul style="list-style-type: none"> <li>- High-frequency X-ray generator with multipulse voltage waveform</li> <li>- Operation via user programs integrated in the digital imaging system</li> <li>- Automatic X-ray control system for fully automatic calculation and optimization of the exposure data on the basis of the fluoroscopic values</li> </ul>

Part No. / Product	Description
<b>UROSKOP Omnia, Left</b>	<ul style="list-style-type: none"> <li>- Rating: 65 kW at 100 kV according to DIN 6822, 800 mA at 81 kV</li> <li>- Prepared for the option: Upgrade to 80 kW rating</li> <li>-</li> </ul> <p><b>Digital imaging system FLUOROSPOT Compact</b></p> <ul style="list-style-type: none"> <li>- High-resolution digital imaging system with innovative image display, DICOM network connection and syngo-like user interface.</li> <li>- Multifunctional workstations for acquisition and post-processing of fluoroscopic and radiographic imaging</li> <li>- Supporting urological workflows patient registration, image acquisition, image post-processing, documentation.</li> <li>- Image processing: real-time edge enhancement, positive/negative image display, windowing, contrast/brightness, electronic display (shutter), vertical and horizontal image flip, magnifying glass and zoom functions, free text annotation</li> </ul> <p><b>CARE program</b>, Combined Applications to Reduce Exposure (CARE), a Siemens initiative for dose reduction</p> <ul style="list-style-type: none"> <li>- CAREMATIC: Automatic X-ray control system for fully automatic calculation and optimization of the exposure data based on fluoroscopic values</li> <li>- CAREFILTER: Three-level adaptive CU prefiltration for reducing patient dose</li> <li>- CAREVISION: Pulsed fluoroscopy with selectable pulse frequencies</li> <li>- additional CARE functionality optional</li> </ul> <p><b>DICOM functionality</b></p> <ul style="list-style-type: none"> <li>- DICOM Send: Network interface in DICOM 3 standard for DICOM 3 compatible image transfer</li> <li>- DICOM St C: Feedback from the image archive (St C = Storage Commitment)</li> <li>- additional DICOM functionality optional</li> </ul> <p><b>Accessories included</b></p> <ul style="list-style-type: none"> <li>- Lightweight tabletop extension 95 cm (37.4")</li> <li>- Standard mattress set with head wedge</li> <li>- Elbow supports</li> <li>- Arm shield</li> <li>- Hand control unit and holder</li> <li>- Control panel</li> <li>- Interface for paper printer, CD / DVD burning</li> </ul> <p><b>Siemens Remote Services</b> System Management software package to support Siemens Remote Service (SRS) with the following functions:</p> <ul style="list-style-type: none"> <li>- Basic package Siemens Remote Service for Diagnostics and Repair, Quality Assurance and Software Maintenance.</li> <li>- System operation monitored by an early warning system</li> <li>- The functions are made available in accordance with the maintenance contract package</li> </ul> <p>Prerequisite for the early warning system is a permanent connection to the system via LAN and router. It is the project manager's task to make this available on-site.</p>
<b>Endoscopy shelf , left</b>	<p>Modules such as endo camera, endo light source or HF generator with a maximum weight of 50 kg (110 lbs) and a maximum mounting height of 32 cm can be placed on the shelf. The footprint of the shelf is 39 cm x 42 cm. A device for on-site attachment of a triple socket is integrated in the shelf.</p>
<b>Endoscopy cable holder</b>	<p>Cable holder for HF cable.</p>
<b>Monitor Table</b>	<p>Control room desk (height 72cm, width 120cm, depth 80cm) which accommodates up to 2 monitors as well as keyboard, mouse and control panel.</p>

Part No. / Product	Description
<b>Handheld control</b>	All table movements, travel and park position of the X-ray system, park position of the scattered radiation grid, zoom levels, collimator setting. Individually configurable patient transfer and standard working position. Memory functions for table positions and collimator setting. Storage of fluoroscopy images, navigation in the patient image and reference folder and image reversal. Switch between reference / endoscopy and ultrasound modes. Change of organ program. Stop of automatic fluoroscopy control. The hand-held control attaches magnetically to the control panel in the control room.
<b>Wall Holder</b>	Allows ergonomic, space-saving attachment of the control panel to the wall.
<b>Fluoroloop</b>	Digital background storage during the fluoroscopic scene.
<b>Dicom Query/Retrieve</b>	<p>Retrieving archived images from a digital archive or from a workstation. The images must be available in DICOM – RF (Radio fluoroscopy) or SC (Secondary Capture) format and must have been generated by Fluorospot Compact.</p> <p>Notes on DICOM interface(s)) Only the information stated in the DICOM Conformance Statement (DCS) is binding for the functionality of the DICOM interface(s). The DCS can be downloaded from the Internet under .</p> <p>Functionalities that act across interfaces with/between partner systems require explicit validation, since the interpretation of the interface by the partner/target system lies outside the area of responsibility for this product. Such a validation can be implemented on request against payment of the costs incurred.</p> <p>The quotation does not include any interface changes that may be required, e.g. if existing configuration possibilities are insufficient (does not apply very often). The agreements pertaining to maintenance/service of the product shall apply to any costs incurred by necessary interface configurations.</p>
<b>Dicom Worklist/MPPS</b>	<p>DICOM Worklist: Import of patient/examination data from an independent RIS/HIS.</p> <p>DICOM MPPS (Modality Performed Procedure Step): Sending of dose, patient and examination data to an independent RIS (MPPS).</p> <p>Note on DICOM interface(s)) Only the information stated in the DICOM Conformance Statement (DCS) is binding for the functionality of the DICOM interface(s). The DCS can be downloaded from the Internet under .</p> <p>Functionalities that act across interfaces with/between partner systems require explicit validation, since the interpretation of the interface by the partner/target system lies outside the area of responsibility for this product. Such a validation can be implemented on request against payment of the costs incurred.</p> <p>The quotation does not include any interface changes that may be required, e.g. if existing configuration possibilities are insufficient (does not apply very often). The agreements pertaining to maintenance/service of the product shall apply to any costs incurred by necessary interface configurations.</p>

Part No. / Product	Description
<b>Multifunctional footswitch Advanced</b>	Ergonomic footswitch for the following control functions: table lift, table tilt, table longitudinal and transverse positioning, rocker switch for longitudinal movement of the X-ray system, switch between X-ray/endoscopy/ultrasound image, storage of endoscopic image snapshot, storage of last fluoroscopic image (LIH) and rocker switch for fluoroscopy/radiography
<b>Micturition seat left</b>	Optimized for a comfortable, low sitting height with the patient's feet on the floor during the entire examination, with moving X-ray system. Unobstructed space under the seat for urodynamic measuring equipment. The micturition seat attaches to the horizontal patient table (max. load 136 kg (300 lbs)). Includes two patient arm rests which enables the patient to keep his/her arms in a relaxed position while undergoing the examination.
<b>Holder for plastic drain bag</b>	Flexible, tiltable spring band frame for use at the perineal table end, allowing easy attachment of a plastic drain bag with drain hose.
<b>Accessories cart</b>	Mobile accessories cart with holders allowing the space-saving storage of all accessory components of the UROSKOP Access (tabletop extensions, Coxafix leg supports, arm rest, footboard, micturition seat, infusion bottle holder, etc.).
<b>Accessories cart</b>	Mobile accessories cart with holders allowing the space-saving storage of all accessory components of the UROSKOP Access (tabletop extensions, Coxafix leg supports, arm rest, footboard, micturition seat, infusion bottle holder, etc.).
<b>Radiation protection, removable</b>	Radiation protection for insertion into the accessory rails of the collimator for fluoro examinations close to the patient with overtable radiographic systems. The radiation protection consists of a holder with two radiation protection elements to be attached as desired.
<b>Initial onsite trng 32 hrs -</b>	Up to (32) hours of on-site clinical education training, scheduled consecutively during standard business hours for a maximum of (4) imaging professionals. Training will cover agenda items on the ASRT approved checklist. Uptime Clinical Education phone support is provided during the warranty period for specified posted hours. <b>This educational offering must be completed (12) months from install end date. If training is not completed within the applicable time period, Siemens obligation to provide the training will expire without refund.</b>
<b>Follow-up Training 16 hours</b>	Up to (16) hours of follow-up on-site clinical education training, scheduled consecutively (Monday - Friday) during standard business hours for a maximum of (4) imaging professionals. Uptime Clinical Education phone support is provided during the warranty period for specified posted hours. <b>This educational offering must be completed (12) months from install end date. If training is not completed within the applicable time period, Siemens obligation to provide the training will expire without refund.</b>
<b>Amatech Leg Holder</b>	<p>Leg Holders with "Piston lift" for use with the Urooskop Access. Leg holders allow intra-operative positioning without side rail adjustments or compromising the sterile field. Designed for laparoscopy and other procedures requiring low lithotomy positioning. These leg holders are designed to help neutralize leg weight and can accommodate patients that are up to 350 lbs. in weight.</p> <p>Additional features:</p> <ul style="list-style-type: none"> <li>- The lightweight molded boots are lined with soft pads that encapsulate the foot to keep it from slipping out-even in radical elevated lithotomy positions.</li> <li>- Reduces pressure under the fossa or where the peroneous nerve is superficial.</li> <li>- The comfortable squeeze grips permit adjustment of lithotomy and abduction positions for optimal surgical site exposure.</li> <li>- Once the patient is positioned, simply release the handle to secure the leg-holders.</li> <li>- Socket and pad set are included with the purchase of the Leg Holders.</li> <li>- Includes one year warranty through Amatech.</li> </ul>
<b>Armboard with trigger adjustment</b>	Armboard with trigger adjustment for attachment to the Urooskop Access. The armboard pad is not included and must be ordered separately. AMP003824RBB20A1 – 2" armboard pad

<b>Part No. / Product</b>	<b>Description</b>
<b>Armboard with trigger adjustment</b>	Armboard with trigger adjustment for attachment to the Urooskop Access. The armboard pad is not included and must be ordered separately. AMP003824RBB20A1 – 2" armboard pad
<b>1 in armboard pad</b>	1" armboard pad to be used with the Armboard with trigger adjustment (part number AMFABSLTE)
<b>1 in armboard pad</b>	1" armboard pad to be used with the Armboard with trigger adjustment (part number AMFABSLTE)
<b>CF Urology drain bag (20)</b>	Urology Drain bag designed specifically for the Siemens Urooskop Access. Made of Durable Vinyl, this drain bag utilizes an under-buttocks flap to direct fluids into the bag. Sterile, individually pouched.
<b>Urooskop Table Pad</b>	Compression Formed Urology Table pad designed to fit the exact specifications of the Siemens Urooskop Table with integral drain flap.
