

Item No.	Qty No.	Description
1	1	<p>Discovery XR656 Base System with TWO FlashPad Detectors</p> <p>The Discovery XR656 is an advanced digital radiographic imaging system that provides excellent image quality, a variety of image manipulation and post-processing tools as well as the option to utilize GE Healthcare's exclusive advanced clinical applications. Powered by FlashPad, GE's wireless digital detector, workflow is streamlined with TWO portable detectors that can be used in the table, wall-stand or freely to best accomodate most 2D exam requirements as well as advanced radiographic requirements.</p> <p>At its core, the Discovery XR656 delivers improved productivity through an efficient and intuitive workflow. The base system comes equipped with a systems cabinet, acquisition review workstation, image processing tools, short-term storage and quick in-room viewing of images. Also included is a host of networking and connectivity options, dose reporting and system maintenance. These features are designed to make this system easy to use and reliable while providing high quality radiographic images in a digital environment.</p> <p>The Discovery XR656's core feature set can help streamline even the toughest exam. Consistent image quality helps reduce retakes, and unique image processing helps save time. With DICOM connectivity, the Discovery XR656</p>

Item No. Qty	Description
	<p data-bbox="480 151 891 207">connects easily to HIS, RIS or PACS for efficient data transfer.</p> <p data-bbox="480 233 849 289">The Discovery XR656 base system includes:</p> <p data-bbox="480 312 846 369">Two wireless Digital Detectors with batteries and optional tether.</p> <ul data-bbox="500 392 959 1535" style="list-style-type: none"> <li data-bbox="500 392 959 562">• Single panel (non-tiled) amorphous silicon detector with a Cesium Iodide scintillator and two handgrips that facilitate easy positioning and a secure grip. <li data-bbox="500 577 959 747">• Wireless connectivity through Ultrawide Band Technology for fast, efficient and secure communications between the detector and the base system. <li data-bbox="500 762 959 819">• Image area 40.4 cm x 40.4 cm (15.9 in. x 15.9 in.) <li data-bbox="500 833 959 861">• Active matrix 2022 x 2022 pixels. <li data-bbox="500 875 959 903">• Pixel pitch 200 microns. <li data-bbox="500 917 959 974">• Typical upper dynamic range 7.8 mR @ RQA5. <li data-bbox="500 989 959 1016">• TypicalDQE 68 @ Olp @ RQA5. <li data-bbox="500 1031 959 1129">• Weighs 4.32 kg (9.52 lb.) without battery, 0.18 kg (0.40 lb.) battery weight. <li data-bbox="500 1144 959 1201">• Dimensions: L 580 mm, H 452 mm, T 24 mm. <li data-bbox="500 1215 959 1272">• Can support up to 160 kg (352 lb.) of distributed load. <li data-bbox="500 1287 959 1457">• Battery or tethered operated. Includes two rechargeable and exchangeable batteries and 7 m cable (4 m or 10 m optional) for optimal connectivity and power. <li data-bbox="500 1472 959 1535">• One 6:1 clip-on grid for FlashPad detectors.

Item No.	Description
	<ul style="list-style-type: none"> Battery allows for 150 images to be taken in 3 hours. QAP (Quality Assurance Procedure) FlashPad detector can support Advanced Applications that are options available on the Discovery XR656
	<p>Acquisition Workstation</p> <p>The Acquisition Workstation is the primary interface to the network and provides image post-processing capabilities. The System Controller Module provides single point control, directing and coordinating overall system operation, while monitoring all system modules automatically through software.</p> <p>The Acquisition Workstation includes:</p> <ul style="list-style-type: none"> Two 19-inch Flat Panel Monitors that help minimize desktop space required. Keyboard and Mouse CPU Tower with 6GB RAM, 320 GB of hard drive storage and capacity for over 22,000 images. 120/140 VAC, 50/60 Hz. Easy Image Manipulation and Image Display Tools which include: <ul style="list-style-type: none"> Window width and level Gray scale/contrast invert Interpolated zoom and roam Image flips (horizontal, vertical) with automatic indicator Image Rotate - 90 degree

Item No.	Qty	Description
		<p>increments</p> <ul style="list-style-type: none"> - Free rotation - 360 degrees - Image orientation management - Electronic Left/Right Markers - Free text annotation - Manual shuttering - Image Annotations and Measurement Tools - Multi-Resolution Post Processing - Customizable Image Processing to Match - User Preferences - CD-RW and DVD Drive for Image Archive - Image Viewer on Archive CD's and DVD's
		<p>Acquisition Control System</p> <ul style="list-style-type: none"> • Single Point System Control and Monitoring. • Auto-Protocol Programming: comes with default set of exam and view protocols and the ability to build an infinite number of exams or views through the editor function. User also has the ability to attach acquisition protocols. • System manager allows equipment error logging and provides resident power-up diagnostics. • kVp selections range from 40-150 in 1 kVp increments • Focal Spot Sizes of 0.6 and 1.2 mm - mA

Item No. Qty	Description
	<p>Patient Management</p> <ul style="list-style-type: none"> • DICOM Modality Worklist for HIS/RIS - SCU (with programmable auto refresh) • Patient edit/automatic foldering (Copy exam) • Patient Dose Reporting Calculated Dose Monitoring (mGy) • "Patient Directory" provides fast access to the image and exam database for case reviews and file management. • Detector Exposure Indicator: tool for detector dose feedback to ensure exposure was within normal limits. • Emergency Patient Exam Capability Emergency patient feature - allows user to open exam and acquire images without a worklist entry. • The Copy Patient function allows merging of the patient information with the exam images. • Fast Image Display - Average time for a partially processed image is approximately three seconds and less than eight seconds for a fully processed image. Times may vary based on how the detector is connected to the system (i.e. docked, tethered or wireless) • Set of default adult and pediatric protocols allows quick selection of the appropriate techniques for common procedures/exams with the ability to define unlimited number of custom protocols.

Item No. Qty	Description
	<ul style="list-style-type: none"> Set of 4 Factory (GE pre-set) image processing selections (looks) optimized for each anatomical view with the ability to define multiple Custom looks for each anatomical view/ patient size combination. Automatic image storage and print with DICOM 3.0 and IHE Compliant networking, further increasing exam throughput and decreasing examination time for patients.
	Image Quality and Dose
	<ul style="list-style-type: none"> Multi-resolution image processing capability. Tissue Equalization used to correct over-penetrated and under-penetrated areas within the image. Auto and manual image shuttering cropping tool. Automated brightness/contrast setting (Smart Windowing) Orthopedic Magnification/Print. Detector Exposure Index (DEI) - dose tracking and QC metric. Dose Area Product (DAP) - entrance dose metric. Grid Line Reduction (selectable) Intelligent Collimator Edge Detection automated, image based cropping/shuttering tool that relies solely on image information to locate the collimator edges present in the image. Orthopedic Magnification/Print 7/20

Item No. Qty	Description
	<p>DICOM and Standard Networking Capabilities</p> <p>Images may be transmitted manually or automatically through the DICOM interface to printers, archival devices, servers or review workstations.</p> <p>Please refer to the DICOM Conformance Statement for complete definition of supported DICOM connectivity services.</p> <p>DICOM and Standard Networking Capabilities include:</p> <ul style="list-style-type: none"> • Ethernet Network Link - DICOM 3.0. • DICOM Storage (with auto-send to different locations) • DICOM Storage Commitment (with programmable auto delete function) • DICOM Modality Worklist for HIS/RIS (with auto refresh) • DX/CR Worklist Filtering. • DICOM Media Interchange on DVD-R. • DICOM Modality Perform Procedure Step (MPPS) feedback to the HIS/RIS (SPS PPS) • DICOM Grayscale Print (with print layout at the console) • DICOM Query/Retrieve (retrieves images back from PACS) • System Access & Authorization Control to support HIPAA Compliance. • Full Range of Printing Options. • Numerous Layout and Format Options.
