QTY	CATALOG	DESCRIPTION
1- FUJI XG5000 Multi-Plate Reader System		
1	X-XG5000-LITE	<p>Fuji's XG5000 high capacity reader with the Flash Lite IIP workstation. The fastest cassette-based reader available in the industry today, ideally suited where image availability is most critical and procedure volume is highest, such as ED, Trauma and the main department.</p> <ul style="list-style-type: none"> - 4 independent cassette drives to process up to 165 IPs per hour - Image preview at the IIP in as little as 15 seconds - Cycle times of less than 39 seconds for maximum technologist productivity - Simplified user interface for exam processing in as few as three steps - Compact Flash Lite IIP for placement where patient ID and image preview are most convenient - Ability to integrate multiple Flash IIP consoles and FCR readers to enhance workflow. - Three (3) days of Professional Services are included in the package. - Hardware includes: XG5000 reader for IP scanning & erasure, UPS w/surge protection & power conditioning & Flash Lite IIP workstation <p>The Flash Lite IIP is an ID and QA workstation designed with the features to enhance productivity of the exam room technologist. The package includes hardware and software components used most frequently in the exam room, such as exam selection, image preview, basic annotation and QC tools as well as DICOM connectivity to a RIS/HIS and PACS</p> <ul style="list-style-type: none"> - Perform patient ID, image processing, QA and image transmission from a single compact workstation - Hardware includes desktop CPU (3.0GHz, 4G RAM, 160G Hdd), keyboard, barcode reader & 19 in. color touch screen LCD monitor - Software features including <ul style="list-style-type: none"> > Main application software for simplified patient ID and QA > DICOM Worklist Management for interface to RIS/HIS > DICOM CR Store for connectivity to PACS > QC adjustments including exam reprocessing, sensitivity, latitude, density and contrast <p>MFP (Multi Frequency Processing) - advanced image processing which optimizes edge and gray scale enhancement of multiple frequencies within an image, simultaneously, for improved visibility of both dense and peripheral tissue</p> <ul style="list-style-type: none"> > FNC (Flexible Noise Control) - advanced image processing for intelligent suppression of noise without loss of diagnostic information or sharpness

		<ul style="list-style-type: none"> > Image Magnification - enables full screen display of an image, as well as image magnification and zoom > Free text annotation - ability to type comments and add them to the digital image > DICOM Print - enables DICOM Print function from the Flash IIP workstation > Technologist editing tools such as automatic and manual Shutters (black borders) and movable annotation markers > Basic security features - customizable technologist log in/log out & user restrictions > Statistical Analysis reporting - Text file download of patient image database, including reason for image rejection coding, for reject or other performance analyses > Synapse Web Query Shortcut - opens Fuji PACS browser without closing IIP application to enable viewing of a patient's prior exams on the IIP. Only compatible with Fuji Synapse PACS
1	XDICOMPRINT23	Enables DICOM Print function from the Flash IIP workstations - 2-3 License (1 per IIP)
1	XIIPMAG	Image Magnification is a powerful tool to enhance QA functionality at the Flash IIP console. Image Magnification software enables the full screen display of an image, as well as image magnification and zoom for display of images that require a closer look before transmission.
1	XFREETEXT	Ideal for technologists who need to quickly and easily add comments to the digital image. Free text annotation software enables users to type comments and input them into an image.
10	XCASS-14X17CC	14X17 CASSETTE TYPE CC
10	R230147ST6-SPKG	14 X 17 ST VI IMAGING PLATE SINGLE PKG
10	XCASS-24X30CC	24X30 CASSETTE TYPE CC
10	R230140ST6-SPKG	24 X 30 ST-VI IMAGING PLATE SINGLE PKG
10	XCASS-LBL-HU-00	Anatomical Cassette Label sheet
