

## AUDIO-VIDEO EQUIPMENT PROPOSAL

Please complete the fill-ins below for the equipment that is being proposed for installation of this project. The fill-in of all entries below is not required; the need and number of components/items required for the project is determined by the offerors proposal. The equipment proposed by the offeror will be evaluated in a technical evaluation to determine the best value for the government. Offerors may submit their proposed equipment components on a separate proposal form; however, the manufacturer name and model number of each item must be annotated on the proposal to be considered. Equipment proposals that do not contain both brand name and model number will be considered technically unacceptable. The evaluation of proposed equipment found not to be within the Veterans Affairs project specifications may qualify the offerors proposal to be considered technically unacceptable.
