1. The SEL protective relays is UL Listed with proprietary system components, manufacturer dependent replacement parts and manufacturer specific programming protocol (per listing requirements) which allows for proper operation of the electrical system. SEL Protective Relaying is microprocessor-based protective relays, integrated into 4160 volt the electrical medal clad vacuum break circuit breakers for overcurrent and line protection with event reporting. The existing SEL relays are protecting the existing 3.2 MW ESG cogeneration natural gas turbine and are acceptable to the electrical utility (ComEd) for

paralleling load.

(5) DESCRIBE WHY YOU BELIEVE THE ORDER REPRESENTS THE BEST VALUE CONSISTENT WITH FAR 8.4 TO AID THE CONTRACTING OFFICER IN MAKING THIS BEST VALUE DETERMINATION:

All systems described are core to the safe operation of the facility and give a reasonable standard of care to the patients. The Jesse Brown facility has elected to standardize these relays for ease of operation, maintenance, energy management, etc. It would be impractical and compromise campus operations to use different relays at different locations throughout campus. Therefore, the most cost effective solution for expansions or upgrades to the system is to expand the existing relay system.

(6) DESCRIBE THE MARKET RESEARCH CONDUCTED AMONG SCHEDULE HOLDERS AND THE RESULTS OR A STATEMENT OF THE REASON MARKET RESEARCH WAS NOT CONDUCTED:

Other equipment manufacturers or sources claiming to be "equal" have been tried in the past and found to be deficient. This product contains proprietary protocols and is the only product that is fully compatible with the existing campus-wide card access security/alarm systems.

(7) ANY OTHER FACTS SUPPORTING THE JUSTIFICATION:

All these systems and agreements were based on competitive bid awards meeting the VA standards

(8) A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS THAT LED TO THE RESTRICTED CONSIDERATION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES IS MADE:

It is not practical to have multiple systems or agreements for these specific systems
