

RFI's: VA261-14-Q-0515- Activation Artwork

1. Are the images shown in the package mandatory or can similar images be used? Some of these images have been pulled from flickr and are often very difficult or impossible to license (must be licensed to use on projects like this). Also, what the response date?

VA Response- This question is addressed in the specification for the artwork under...

Part 1 General Information on page 5 of 9

"1.1.B. Value engineering alternatives that differ from the drawings and specifications will be considered AFTER the award of the project. All items for consideration of the award package will need to meet these specifications and drawings to provide the organization with comparable packages from each vendor to review."

The VA will consider alternatives from the winning bidder after award of the contract as stated in the specifications

2. On the artwork bid #VA261-14-Q-0515 when it states multiple quantities for one item do you want all of them framed? For example if there is a quantity of (5) for one print, do you want all (5) matted and framed? Or just (1) matted and framed and the remaining (4) prints loose?

VA Response- All prints will be matted and framed (5 prints = 5 matted and framed). In the simplest of explanations, we will have prints that are the same mounted in various different locations.
