EXHIBIT F-1 - CALCULATION OF SELF-PERFORMED WORK

SUBMITTED IN RESPONSE TO RFP VA246-14-R-0318

PROJECT: 658-14-117, Replace Finishes Various Bldgs., VAMC Salem, VISN 6

INSTRUCTIONS FOR CALCULATION OF PERFORMED WORK IAW "Limitations on Subcontracting" (FAR 52.219-14)

A. Identify what parts of the project will be "self-performed" by in-house forces and the related cost for each part, as defined below. Provide and illustrate the calculation for "percent of self-performed work", in accordance with the definitions below.

B. Definitions regarding self-performance of work by the Prime Contractor, in accordance with Contract Clause: "Limitations on Subcontracting" (FAR 52.219-14):

a. The work in this contract is "general construction" for purposes of Contract Clause "Limitations on Subcontracting."

b. "Self-performed work" generally includes costs for: mobilization and utilization of owned or rented plant and equipment to be operated by the contractor's own employees and labor associated with the aforementioned equipment; contractor's own labor to fabricate or to install materials into the finished construction; performance by the contractor's own employees of design work, land surveys and other engineering or technical specialist services required by the contract; supplies to directly support the aforementioned work to be accomplished by the contractor's own employees; and the contractor's own job overhead costs. Contractor markups for profit, general and administrative overhead, bonds, or other indirect costs on "self-performed" or subcontracted work are not "self-performed work" and are to be excluded from "total cost of the contract" for calculation purposes. Rental of plant or equipment for operation by subcontractors is not "self-performed work" but shall be included in the "total cost of the contract" for calculation purposes. Cost of materials to be incorporated into the work and supplies to support other than construction by the contractor's own employees are excluded from the above definition. Do not include these costs in the calculation.

c. "Total cost of the contract" means the total direct (variable, fixed, one-time and semi-variable) costs to the contractor, including jobsite overhead costs but excluding the cost of any materials to be incorporated into the work, to construct the project. It generally includes the cost of all self-performed work, as defined above, and all supplies and subcontract costs. The cost of subcontractor furnished materials will be excluded only to the extent that they can be segregated and identified in the subcontractors' proposals.

d. "Percent of self-performed work" is calculated by dividing the above defined cost of "self-performed work" by the "total cost of the contract" and multiplying the result by 100%."

IDIQ MATOC NORTH

RFP VA246-14-R-0318

Use a format similar to the following to identify and calculate cost of the work to be self-performed. Refer to the definitions pertaining to "Self-performance of work", "On the Site" and "Total amount of work to be performed under the contract".

(Includes mobilization and utilization of owned or rented plant and equipment to be operated by the prime contractor's own employees; only those materials which will be both purchased and installed by the prime's own forces; labor associated with those aforementioned materials or equipment; only those supplies to directly support work performed by the contractor's own employees; and the contractor's own job overhead costs.)

Clearly describe the work to be self-performed:

Show Calculation of Self-Performed work: _____

B.1 Total Offer Price: \$ _____

B.2 If applying for consideration as a General Contractor (multi-discipline projects) subtract Specialty Trades (Unless being self performed)\$ _____

B.3 Subtract G&A, home office overhead, prime contractor's markups for profit, bond, state use tax, etc. (\$)_ _____

B.4 Remainder is "Total amount of work to be performed under the Contract" = \$ _____

B.5 "Work to be self-performed": = \$ _____ Amount shown on this line should match the amount shown for "Show Calculation of Self-Performed work"?

(Includes mobilization and utilization of owned or rented plant and equipment to be operated by the prime contractor's own employees; only those materials which will be both purchased and installed by the prime's own forces; labor associated with those aforementioned materials or equipment; only those supplies to directly support work performed by the contractor's own employees; and the contractor's own job overhead costs.)

B.15 % Self-performed Work = Line B.5 / B.4 X 100% = _____ %
