VHA NATIONAL FORMULARY

Jul-14

The VANF is dosage form specific. If a specific dosage form is not listed, the specific product in question should be considered non-formulary (although oth as formulary). Dosage forms such as TAB and CAP, ORAL are considered immediate release. Sustained release products are listed individually. Formulary and strengths. In the case of products with multiple dosage forms and strengths, not all forms and strengths need to be stocked. Facilities should make the patient needs."

PA- There are three levels of Prior Authorization

- **Prior Authorization-National (PA-N)** refers to medications that are formulary, but require prior approval at the national level before dispensing.
- **Prior Authorization-VISN (PA-V)** refers to medications that are formulary, but require prior approval at the VISN level before dispensing.
- **Prior Authorization-Facility (PA-F)** refers to medications that are formulary, but require prior approval at the facility level before dispensing.

Prior Authorization is used to insure that the medication is appropriate for each individual Veteran.

R The national restriction for antibiotics is that all decisions regarding which agents to carry in these classes will be made at the local or VISN level. These
