

Site Visit Questions – Install Nurse Call System - 9-11-2014

Is the requirement to install a new nurse call system or is it connecting to an existing system.

Not to install a new system. To connect to an existing nurse call system. No equipment is being purchased. The scope of this project is to place conduits/gang boxes over to where the bed locations are currently from each of the 12 patient rooms to E608 (Communications closet which will house the gateway and the powerswitch).

The nurse call equipment installation will be taken care of by another electrician.

Are existing walls going to be cut into?

Yes

Where in the patient rooms will the call systems be located? Please specify.

In proximity of the patient bed 48" up from the floor.

Do the call systems have to be patient proof? If so, please specify.

All screws used must be tamper proof and stainless plates must be rounded and beveled.

What is the path of travel from the patient room to server room for the wire connections?

Not Applicable.
