		PROFESSIONAL AND TECHNICAL
2	1	**CR Implementation Services Fee** Off site Project Management provides a single point of contact between the customer and Agfa to coordinate all aspects of system implementation including, but not limited to: the site survey, site preparation, network, modality and other information system integration, equipment installation, configuration and customer training. The Implementation Manager assures that appropriate timelines are set and adhered to by providing schedules, monitoring time-lines, and conducting customer meetings via teleconference for planning and review of the implementation progress. The Implementation Manager will record and address open issues through appropriate resource assignment and insure that all project requirements and documentation are delivered completely to the customer The Implementation Manager stays engaged until customer acceptance.. Please Note: The description above is a minimum guideline for implementation management. On site Project Management is an available option. Special pricing applies to any on site Project Management requirements.
