

**VA MEDICAL CENTER LONG BEACH  
MECHANICAL PIPE SHOP  
WATER FLUSHING RECORD SHEETS**

**NOTE:** REGULAR FLUSHING OF HOT AND COLD WATER AT OUTLETS (e.g., sinks, taps, showers), PARTICULARLY THOSE NOT IN ROUTINE USE OR WHICH EXPERIENCE LOW WATER FLOW, IS NECESSARY TO ENSURE THAT OXIDANT RESIDUAL IS MAINTAINED AT SUFFICIENT LEVELS FOR LEGIONELLA GROWTH INHIBITION THROUGHOUT THE WATER DISTRIBUTION SYSTEMS AND AT FIXTURES. ENSURED THAT NEWLY INSTALLED PIPING AND DISTRIBUTION SYSTEM COMPONENTS ARE FLUSHED OF DEBRIS AND DISINFECTED. PIPING AND COMPONENTS MUST BE CLEANED AND PROTECTED FROM ACCUMULATION OF DEBRIS AND CONTAMINATION PRIOR TO AND DURING INSTALLATION. ENSURED THAT UNUSED WATER BRANCH LINES AND DEAD-LEGS, WHERE ACCESSIBLE, ARE REMOVED AND CAPPED AT THE MAIN SUPPLY/RECIRCULATION SUPPLY LINES TO LIMIT STAGNATION AND RESERVOIRS FOR LEGIONELLA GROWTH. (VHA DIRECTIVE 1061)

<b>REASON or CAUSE FOR FLUSHING:</b> e.g., NOT IN ROUTINE USE/LOW FLOW/REPAIRS/NEW.. 								
DATE	TIME	BUILDING	ROOM No. OR LOCATION	FLUSHING DURATION	WATER TEMPERATURE	OXIDANT RESIDUAL LEVELS (IF APPLICABLE)		UNUSED LINES/DEAD-LEGS/STAGNATION LINES REMOVED? "YES / NO" or COMMENTS
