1		1	**DRX Evolution System**				
	1010982	1	**DRX-Evolution System with Motorized OTC and Console** DRX-Evolution System with Motorized OTC and Console, Motorized Wallstand (for Fixed 43 x 43 Detector) and Motorized Fixed Table (with Bucky Tray)An exceptionally versatile, flexible DR suite with modular components to fit your specific space, your workflow and your budget. The single operator console integrates generator settings, detector controls, and image delivery and includes a touch screen interface plus keyboard, mouse and barcode reader. It is powered by sophisticated workflow and image processing software. The motorized wallstand has a wide range of motion with four axes of movement, plus optional lateral movement. The Bucky tilts to horizontal for extremity or supine exams, plus it features side-to-side angulation to more easily perform oblique exams. The motorized fixed table utilizes DRX wireless protable detectors and simplifies patient positioning with an elevating, four-way floating top which can accommodate patients weighing up to 600 lbs (272 kg)The motorized Overhead Tube Crane (OTC) controls are designed and positioned for convenience and efficiency. A tube head touch-screen interactive display shows exam type, technique, AEC cells, tube head angle and more. Standard motorization features				

Item	CAT #	QTY	Description	List Unit Price	Govt. Disc	Govt. Unit Price	Ext. Net Price
			allow for auto-centering (tube to center of detector), auto-tracking and auto-perpendicularity for fast, accurate source-to-detector allignment. Auto-positioning functionality (option) allows for pre-programmed tube and Bucky positions, generator parameters and collimator settings to maximize technologist efficiency. Motorized Overhead Tube Crane (OTC):Vertical travel: 161 cm (63 in)10.4" LCD touch-screen displayBeta range: +- 182 degreesConsole Monitor:1280 x 102448.3 cm (19 in) touchscreen monitorMotorized Wallstand (for Fixed 43 x 43 detector):Bucky vertical range: Floor to 180 cm (70.9 in)Bucky tilt: -20 to 0 to 90 degreesBucky angulation: +/- 45 degrees Motorized Fixed Table (with Bucky Tray):Maximum patient weight: 272 kg (600 lb)Table height range: 53 cm (20.9 in) to 86 cm (33.8 in)4-way floatGrid: 12:1, 80 lines per cm (203 lines per inch), Fixed Focus 110 cm (43 in)				
	1009513	1	Fixed 43 X 43 cm CSI Detector				
	1006675	1	**DRX-1C Detector** Wireless, cassette-size, 35 x 43 cm CsI Detector for fast workflow and instant access to images. Fits into standard Bucky trays and the wireless capability make it also ideal for tabletop use. The detector uses Cesium Iodidi (CsI) for dose-sensitive applications. Wireless standard: 802.11nImage size: 35.0 x 42.3 cmPixel Pitch: 0.139 mmExternal Dimensions: 35 x 43 Cassette (ISO 4090) 38.35 x 45.95 x 1.55 cm				
	1001163	3	DRX Detector Battery

			preserving detail contrast in both over-penetrated and under-penetrated areas. Automatically processes and delivers diagnostic quality images to PACs based on look preference that can be uniquely specified by each site. Includes grid line suppression that prevents alieasing artifacts and application of a collimator mask. Five independent controls are available for the user for image adjustments in an intuitive user interface.				
	1745967	1	**IHE Schedule Workflow Software** Automatically notifies the HIS/RIS about the status of the exams. Includes DICOM Modality Performed Procuedure Step (MPPS) that can send exposure Information including DAP values (if installed) to the HIS/RIS.				
	8673600	1	**Modality Worklist Software** Facilitates automatic transfer of patient and procedure data from your HIS/RIS system, eliminating manual data entry, and increasing technologist productivity.				
	1169341	1	**Administrative Analysis and Reporting Software** Provides consolidated user-friendly reports from all Carestream CR and DR systems on the network. Example reports include repeat statistics by user and exam type, exposure data by user and exam, detector usage, system use by radiographer and much more. Users can also generate custom reports. Helpful for performance tracking and operational improvements.

	8771719	1	**Advanced Display Software** Change technique/view from the OTC and preview the acquired image at the OTC for acceptance or rejection.				
	1057223	1	**IHE Does Reporting Software** Collects and distributes comprehensive dose information to PACs including DAP value, techniques, and exposure indices.IHE has defined a protocol for reporting patient exposure dose. This feature will create a report using the IHE structure and send it to whatever destination the user identifies.				
	1808047	1	**IR Remote Control** Infrared remote control for wallstand up/down/tilt Bucky position, lateral movement on rail, autocentering, autotracking, autopositioning, collimation size adjustment, and collimator light on/off.				
	1008705	1	**Rolling Detector Holder** Provides handsfree positioning of detector or cassette in any orientation for convenient and effective imaging.

			pathology assessment due to improved visibility.				
	1036581	1	**Linear Tomography Option** Linear tomography is designed to bring into focus only those objects lying in a plane of interest while blurring structures on either side of the plane. The tube is moved in one direction while the detector moves in the opposite direction.				
	1044387	1	LINEAR TOMO Phantom/ FOR DRX-AUTO EVO				
	1004530	1	**DR Total Quality Tool Software** Software used in conjuction with the DR Total Quality Tool Phantom. Performs objective image tests and QC measurements on Carestream DR detectors. The software analyzes flat field, dark noise and phantom image test performance. Test results are provided automatically with historical trending. The user can export the data for independent analysis. The software uses the same interface as that used for patient exams. Perform these tests when it's convenient for you - without interrupting workflow or incurring the cost of third-party testing.
