12. QUALITY ASSURANCE

12.1 Performance Requirements Table. This PWS not only discusses work to be performed, but also contains performance standards and acceptable performance levels (APL). Performance standards are "tools" the

government uses to measure level of performance. A standard is an optimum performance level against which actual performance can be measured or evaluated. For example, in the statement "complete a service call in 24 hours" the standard is 24 hours. The number of days actually taken to finish this task is the performance indicator, which determines if the work performed was below, met, or exceeded the standard. Developing accurate performance standards is crucial to ensuring that the actual performance received, regardless of the service provider, meets the requirements of the Performance Work Statement. This PWS includes performance standards for each of the Functional Areas of the PWS. The performance standards provided with this PWS seek to state the characteristics of properly completed outputs. Each performance standard contains standards for both quality and timeliness.

- 12.2 Quality Assurance. The COR will inspect for compliance with Contract terms throughout the Contract period. Evaluation will be based on the Contractor's compliance with the requirements set forth in the Performance Requirements Summary (PRS). The Government will monitor the Contractor's performance under this Contract by performing surveillance using the PRS. The PRS is used primarily to determine if the Contractor is performing all required outputs. The PRS also indicates for contractors the importance of each required service.

The bidder or offeror agrees that if a contract is awarded to him/her, as a result of this solicitation, he/she will not advertise the award of the contract in his/her commercial advertising in such a manner as to state or imply that the Department of Veterans Affairs endorses a product, project or commercial line of endeavor.

The information furnished may include specific references to information previously furnished or to information otherwise available to the purchasing activity.

ADDENDUM TO FAR 52.212-2

EVALUATION--COMMERCIAL ITEMS (OCT 2014)

1. The Government will award a contract resulting from this solicitation to the responsible offeror whose offer conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following factors shall be used to evaluate offers:
2. Offerors must submit information for the below criteria in sufficient detail to permit proper evaluation. Submittals must be in a format that follows the sequence of criteria set forth in the paragraphs below. Absence of information will be deemed as if no support for that factor is available.
3. Offerors will be evaluated on the basis of two criteria, TECHNICAL and PRICE. Award will be made to the offeror who proposes the combination of price and technical factors that represent the best value to the government based on the evaluation criteria listed below.
4. EVALUATION CRITERIA
 - 4.1 Non-Price Evaluation Criteria:
 - 4.1.1 All Non-Price Factors, when combined, are considered significantly more important than the price.
 - 4.1.2 The below Table provides level of importance for each Factor. Each Factor within the same level is of equal importance to each other. Non-Price Factors are as follows:

Factor/Sub factor	Description	Relative Importance
Factor 1	Salient Characteristics	1 st Level, Most Important
Factor 2	Technical/Management Approach	2 nd Level, Slightly less important than 1 st Level
Factor 3	Schedule	2 nd Level, Slightly less important than 1 st Level
Factor 4	Past Performance of the Prime	3 rd Level, Slightly less important than 1 st and 2 nd Levels combined

4.3 Price Evaluation Criteria:

Factor Number	Description	Relative Importance
Factor 1	Contract Line Item Schedule	4 th Level, Significantly less important than 1 st , 2 nd and 3 rd combined

- 4.4 All Non-Price Factors, when combined, are considered significantly more important than the price. It is pointed out, however, that should technical competence between offerors be considered approximately the same, the price could become more important in determining award.

5. EVALUATION PROCEDURES

- 5.1 Technical Evaluation/Past Performance: Technical proposals will be evaluated per FAR Part 15 by a Source Selection Evaluation Board (SSEB) comprised of representatives of the Veterans Administration. Pricing data will not be considered during this evaluation. Criteria for the technical evaluation are set forth elsewhere in the solicitation and will be the sole basis for determining the technical merit of proposals. The SSEB shall use the order of importance definitions and technical merit ratings described earlier in this section of the solicitation to perform their technical evaluation. To be considered for award, proposals must conform to the terms and conditions contained in the RFP. No proposal will be accepted that does not address all criteria specified in this solicitation or which includes stipulations or qualifying conditions unacceptable to the Government.

- 5.2 Price Evaluation: Price is of secondary importance to the technical criteria. Pricing will be independently evaluated to determine reasonableness and to aid in the determination of the firm's understanding of the work and ability to perform the contract.
- 5.3 Best Value Analysis. In determining the best value to the Government, the tradeoff process of evaluation will be utilized. The tradeoff process permits tradeoffs among price and technical factors, and allows the Government to consider award to other than the lowest priced offeror or other than the highest technically rated offeror. You are advised that greater consideration will be given to the evaluation of technical proposals rather than price.
- 5.4 Selection and Award without Discussions: It is the intent of the Government to make award based upon initial proposals, without further discussions or additional information. Therefore, initial proposals should be submitted based on the most favorable terms from a price and technical standpoint. Do not assume there will be an opportunity to clarify, discuss or revise proposals. However, the Government reserves the right to conduct discussions if later determined by the Contracting Officer to be necessary.
- 5.5 Discussions: If Discussions are held. They are usually conducted in writing, but may also be by telephone or in person. Discussions are tailored to each offeror's proposal. The primary objective of discussions is to maximize the Government's ability to obtain the best value, based on the requirement and the evaluation criteria set forth in this solicitation. If a firm's proposal is eliminated or otherwise removed from consideration for award during discussions, no further revisions to that firm's proposal will be accepted or considered. Discussions will culminate in a request for Final Proposal Revision, the date and time of which will be common to all remaining firms.
- 5.6 Proposal Expenses and Pre-Contract Costs: This solicitation does not commit the Government to pay costs incurred in preparation and submission of initial and subsequent proposals or for other costs incurred prior to award of a formal contract.
- 5.7 Release of Information: After receipt of proposals and until contract award, selection information will not be furnished to any firm.

Government databases will be checked and previous customers and/or evaluators may be contacted as references or verification of performance.
 - 6.4.1.4 A lack of past performance information will result in a neutral rating during evaluations.
 - 6.4.1.2 All performance ratings shall be considered for contracts ongoing or completed within the past three (3) years from the date proposals are due. All projects submitted on a Past Performance Questionnaire must be at least 75% complete or must have been completed within the past three (3) years from the date proposals are due. 7.2.2 The evaluation criteria definitions are provided below.

7.2.2.1 Completeness: An accurate reflection, within the price proposal, of all aspects of the technical proposal; contractor compliance with the price preparation instructions in the Request for Proposal (RFP) – Instructions, Conditions, and Other Statements to Proposals; and contractor compliance with all other applicable directions in the RFP. 7.2.2.2 Price Reasonableness: The proposed prices to the government reflect what a prudent person would pay for goods/services when consideration is given to offered prices in the market.

7.2.2.3 Unbalanced Pricing. The proposals will be reviewed for unbalanced pricing. Unbalanced pricing may indicate a proposal error and/or a misunderstanding of the contract requirements by the offeror. Based on the analysis performed, a determination will be made on the appearance of unbalanced or balanced pricing on each proposal.

8.
