Question(s) is/are on the solicitation [☐]

Question(s) is/are on the drawings, specifications, technical data [☐]

Company Name and Offeror: Patriot Construction, Inc.

From (person submitting question):
Chris Cotta

Date of Proposal Inquiry: 9/17/2015

Phone Number: 209-982-9900

Proposal Inquiry: (Type inquiry below) Roofing

Proposal RFI #1 –

Proposal RFI #2 – See Below

Proposal RFI #3 -

Add additional as necessary

The existing roofing will continue to leak after completion of the HVAC project. Roof traffic and construction will accelerate the problem. Water from those leaks will likely run under the existing insulation over the concrete deck and under the new flashing work at the newly installed HVAC, supports and other penetrations. It is likely water will enter the building from the existing roofing under the new HVAC work. How will the government address liability for damage in the new work area from water that enters the system from outside the new work area.

AWS: The VA knows the existing roofing leaks and will not hold the Contractor Responsible for roofing leaks.
