Title: Design Parking Structure

Firm Name:

AE Evaluation Criteria

| Category | Description |
|--|--|
| Past Experience of firm and Proposed Consultants | <i>Relates to Past Experience of the prime and consultant firms and proposed designers. Firm must have proven experience in multi level parking infrastructure design through construction administration.</i> |
| Specialized Experience & Technical Competence | <i>Experience in parking structure design with stringent seismic and Geotech requirements equivalent to the Reno, NV area.</i> |
| Past Performance | <i>Past Performance on contracts of similar scope with respect to cost control, quality of work, and compliance with performance schedules during design and construction phases (prime firm)</i> |
| Capacity to accomplish work | <i>Capacity to accomplish the work in the required time and the ability to adhere to schedules. Provide current workload and total workload capability of the prime firm and proposed consultants. Literature should be included to demonstrate the firm's ability to meet scheduled deadlines. This will allow the Government to determine the availability of experienced personnel during the performance period of the contract as well as the capacity to accomplish the work required.</i> |
| Geographical Location | <i>This factor considers the A/E firm's familiarity of the applicable geographic areas architectural standards and codes, building codes, environmental regulations, soil conditions, and seismic requirements within the Reno, NV area. Prime firm must be able to respond to and be on-site within a four-hour window.</i> |
