High-Density Mobile Shelving for Richmond VAMC

- 1) Confirm that CLIN 0001 is for the materials, while CLIN 0002 is for installation, and then CLIN 0003 is relocation of existing system.

Answer: CLIN 0001 is for equipment, specifically the new High-Density Mobile Shelving system, CLIN 0002 is for labor and materials associated with the installation, CLIN 0003 is for materials and labor associated with the relocation of the existing system.

- 2) Confirm that all stationary Pallet Rack shown on the drawing is included

Answer: As stated in the CLINs, the green highlighted dimension designates where the existing system will be relocated. The yellow highlighted dimensions designate where the new high-density mobile shelving system will be installed. All other areas, without highlighted dimensions, are the responsibility of the facility and are not included in the contract requirement.

- 3) How soon do you see the lights being moved higher and the space cleared for us to work?

Answer: Amendment A00001 amends the solicitation and proposed contract to include a "Notice to Proceed" provision. The facility will be responsible for changing the lights and obtaining approvals before the start of performance. The contract awardee will be provided a "Notice to Proceed" when all facility responsibilities have been completed and performance can begin. The timeframe to issue the notice to proceed is estimated to be relatively short (2-4 weeks).
