Flameshield® Aboveground Steel Storage Tank Option:

BROCHURE

The Flameshield® option is available on all UL-142 double-walled aboveground steel storage tanks manufactured by Highland Tank. All tanks with the Flameshield® option are manufactured to the strict STI specifications and are subject to the Steel Tank Institute's Quality Assurance program. Each tank carries the Flameshield® and SwRi 97-04 labels. All Flameshield® tanks employ a 360° outer wrap. These aboveground tanks can be easily relocated if necessary. Flameshield® tanks are available in a wide range of sizes from 240 to 60,000 gallons. Customized compartments and support systems are also available.
