

A. SECTION A -- STATEMENT OF WORK (SOW)

1. Background:

This solicitation is for manometry catheters for VALBHS.

2. Salient Characteristics of Items:

2.1 The manometry catheters must be compatible with the Manoscan 360 System, model numbers A120 and A300.

2.2 Esophageal manometry catheter must be a high resolution manometry catheter.

3. Support Features:

3.1 Packaging and Marking:

3.1.1 All equipment and/or supplies shall be adequately packaged to prevent damage during shipping, handling, and storage. Bags or packages shall be whole, intact, and not otherwise torn or damaged. Upon delivery, the Government shall examine all packages. The contractor shall be required to replace damaged products at the contractor's expense.

3.1.2 All items shall be marked clearly with the order number, obligation number, and delivery location.

3.2 Deliveries, Ordering, and Performance:

3.2.1 Ordering:

The VA will submit a purchase order to the contractor using an SF 1449. The contractor shall provide all supplies contained in the purchase order. Contractors shall not add or substitute any components or services without prior approval from the contracting officer responsible for the purchase order.

3.2.2 Deliveries:

3.2.2.1 The contractor will ship all items to the VALBHS warehouse at the address listed in block fifteen (15) of the order's SF 1449.

3.2.2.2 The contractor must have the capability to receive the order via facsimile transmission, if necessary. The Government will generally submit all purchase orders to the contractor via email.
