The VA Electronic Contract Management System (VAeCMS) is a comprehensive tool used by VA Acquisition staff to create and manage VA acquisitions. VAeCMS is used to manage the full acquisition lifecycle, including the announcement of solicitations to vendors and the receipt of vendor responses. There are three announcement mechanisms in VAeCMS. VA Acquisition staff will continue to post announcements for full and open competition to FedBizOpps which will now also be available for review, download, and response by vendors via the Vendor Portal. Solicitations for federal supply schedule acquisitions may be posted to e-Buy, will not be available for review via the Vendor Portal and finally, limited competition acquisitions may be announced directly on the Vendor Portal for review, download and response by invited vendors. Additionally, there is a link to the VA Forecast of Contracting Opportunities (FCO) reports available via the Vendor Portal.

This guide provides vendors with information on how to obtain a vendor account and how to log into the Vendor Portal. There are also instructions on how to edit a vendor user's profile once logged in and instructions for viewing the FCO reports. There is access to additional help documentation to assist vendors with using the VA eCMS Vendor Portal to download solicitations and submit responses once a vendor user logs into the portal.
