REQUEST FOR INFORMATION (RFI)			
PROJECT NUMBER:		RFI NUMBER:	001
PROJECT NAME:	Replace Flooring and Finishes, Various Bldgs	DATE REQUESTED:	05/31/16
SOLICITATION NUMBER:	VA-262-16-B-0451	REFERENCE:	Hazmat
DRAWING:	GC-001	SPECIFICATION SECTION:	
DESCRIPTION OF PROBLEM(S) OR INFORMATION BEING REQUESTED			
<p>Please be specific as possible:</p> <p>1.Scope of Work, Part 1.2 – Statement of Bid Items, 1st Paragraph states “Required Abatement of the hazardous containing asbestos floor tiles/mastic will be required to be addressed in the design”. Drawing Sheet GC-001, Hazardous Materials notes state that the A/E team shall have no responsibility for the discovery or presences of hazardous materials of any form for this project. There were no specifications or drawings provided for Hazardous Material Testing or Abatement, so this appears to have NOT BEEN DEALT WITH DURING DESIGN. That leaves us with the following questions:</p> <p>a.Are hazardous materials known or suspected to be present in materials scheduled for disturbance in this project?</p> <p>b.If so, since abatement was not covered by the VA Architect, does that make this a Design-Build project regarding asbestos abatement?</p> <p>c.If not, will the VA modify the Statement of Bid Items to remove the language regarding any hazardous material abatement?</p> <p>d.Whether this is a Design-Build or not, will the VA provide the Hazardous Material Surveys for the areas involved with this project?</p> <p>e.If this is a Design-Build regarding abatement, will the VA provide a modified Period of Performance and a schedule of A/E deliverables to accommodate the A/E submittals or will the VA provide modified drawings and specifications that fully address the scope of work, locations and quantities of ACM to be abated?</p>			
PROJECT MANAGER’S RESPONSE			
<p>VA to respond. See attached asbestos report for B161.</p> <p>b. No this is not a DB project for Asbestos abatement will be due to different site conditions</p> <p>c. No</p> <p>c..</p>

SOLICITATION NUMBER:	VA-262-16-B-0451	REFERENCE:	Coiling Door
DRAWING:	n/a	SPECIFICATION SECTION:	08 33 00 / 09 06 00
DESCRIPTION OF PROBLEM(S) OR INFORMATION BEING REQUESTED			
<p>Please be specific as possible:</p> <p>The Project Manual contains Specification Section 08 33 00 – Coiling Grille. This Coiling Counter Door is also mentioned in Section 09 06 00 – Schedule of Finishes and indicates the coiling door belongs in B161 Reception. We do not find a Room B161 for this project and do not find a coiling counter door anywhere on the Drawings. Will the VA please clarify if a coiling counter door is required for this project, and if so, please provide a drawing and associated details to support the installation of same?</p>			
PROJECT MANAGER'S RESPONSE			
<p>The new coiling door is located in Building 161, room #101A Reception. It is shown in Contract Documents.</p> <p>SRD Architects Inc. 6/20/2016</p>

PROJECT NAME:	Replace Flooring and Finishes, Various Bldgs	DATE REQUESTED:	06/08/16
SOLICITATION NUMBER:	VA-262-16-B-0451	REFERENCE:	Resinous Coatings
DRAWING:	150-AF-601	SPECIFICATION SECTION:	09 97 33.10
DESCRIPTION OF PROBLEM(S) OR INFORMATION BEING REQUESTED			
<p>Please be specific as possible:</p> <p>Specification Section 09 97 33.10 – Resinous Coating Systems for Walls and Ceilings, Part 2.1 – System Description calls for vinyl chip broadcast aggregates. This seems like an unusual system to specify for storage rooms, utility rooms, etc. Will the VA confirm this is the system requested for these applications? Additionally, Sheet 150-AF-601, Finish Schedule, Material Legend has an abbreviation "RES-W" for Resinous Epoxy Paint to be applied on designated walls. Will the VA issue a separate specification for the wall treatment that likely will not specify vinyl chip broadcast?</p>			
PROJECT MANAGER'S RESPONSE			
<p>Resinous epoxy Paint without vinyl chip broadcast aggregates is acceptable.</p> <p>SRD Architects Inc.</p> <p>6/20/2016</p>

SOLICITATION NUMBER:	VA-262-16-B-0451	REFERENCE:	
DRAWING:		SPECIFICATION SECTION:	
DESCRIPTION OF PROBLEM(S) OR INFORMATION BEING REQUESTED			
<p>Please be specific as possible:</p> <p>Will every room or hallway location require sealing with plastic and negative air? If not, which rooms or hallways are so required? In the case of hallway sealing, which will require shutting down the entire affected unit, will the hospital vacate the space(s) of all hospital equipment and furnishings?</p> <p>Will the hospital remove all equipment and furnishings from any affected space?</p> <p>Will there be restrictions as to what routes can be used to transport materials? If so, please identify routes allowed and staging area locations on a site map to enable contractor to determine time to transport materials on a daily basis.</p> <p>Have all asbestos hot zones been noted on the plans? Meaning that there are none other than as noted.</p> <p>If further phasing of the work is necessary to accommodate the hospital will contractor be compensated for added costs per standard direct/indirect overhead calculation methods for delay?</p> <p>Contractors do not know the hospital systems configuration. Will the hospital perform isolation and safe off of their systems such as electrical and fire sprinklers for work by contractor?</p> <p>Can work be performed in both buildings at the same time?</p>			
PROJECT MANAGER'S RESPONSE			
<ol style="list-style-type: none">1. The construction will be done by different phases per sheet 150-GC-102 and 160-GC-102. It's contractor's means and method2. It will be the responsibility of the contractor to move the furniture.3. After Award at time of NTP discuss restriction as what rout can be used to transport materials and staging area will be discussed to several projects4. Please see attached report for asbestos for B161.5. Depending upon given site conditions and time / further phasing will be discussed.6. VA will assist the contractor for all electrical and fire sprinkler shut down for modifications. The contractor to provide 2 - 3 weeks advance notice to the VA for all shut down and inspections.7. Depending on patient work load the using service will determine when and what buildings will be available for construction.
