

**Question:**

Page 16 of 77, Section E, 14, c, the Table shows to include a Volume 2 - Past Performance and states under header 'Page Limitations' that we should only use past performance form. I have not found an attachment for past performance form in the Solicitation Documents, is it sufficient to utilize and provide our own past performance form?

**Answer:**

Use the attached Past Performance Questionnaire (two pages total) to submit the Volume II Past Performance information.

It is the Offeror's responsibility to ensure that the Client's contact information is current and correct (i.e. name, phone number, and email address). The Government will be contacting the Client to verify past performance.

The Volume II Past Performance information will be evaluated in accordance with the Factor 1 Acceptability Standard (PASS).

Per Solicitation Amendment 6 (posted Jun 7, 2016):

- Offerors can submit past performance information for the proposed roofing subcontractor under Factor 1.
- Factor 1 is hereby renamed as "Construction Experience of Prime Contractor and Proposed Roofing Subcontractor."
- If past performance information is submitted on a proposed roofing subcontractor, then the prime contractor is expected to use the proposed roofing subcontractor during the performance of the construction contract.
- An offeror may not propose to use a roofing subcontractor that it does not plan to use during construction contract performance.
