All information received in response to this RFI that is marked as proprietary will be handled accordingly. IAW FAR 15.201(e), responses to this notice are not offers and cannot be accepted by the Government to form a binding contract. Responders are solely responsible for all expenses associated with responding to this RFI.

SOURCES SOUGHT DESCRIPTION

This is NOT a solicitation announcement. This is a sources sought synopsis only. The purpose of this synopsis is to gain knowledge of potential qualified sources and their size classification relative to NAICS 334310 (size standard of 750 Employees). Responses to this synopsis will be used by the Government to make appropriate acquisition decisions. After review of the responses to this sources sought synopsis, a solicitation announcement may be published. Responses to this sources sought synopsis are not considered adequate responses to for a solicitation announcement. The Department of Veterans Affairs (VA), VISN 22 Network Contracting Office, is seeking sources that can provide *Video Display Unit System* that at a minimum meet the following salient characteristics with a brand name or equal product for the VA Loma Linda Healthcare System:

Background

Upgrade video display units from LCD rear projection to LED ultra thin video display is required as part of the ongoing hospital command center upgrade project.

Requirement

Provide design and space planning upgrade services, specialized furniture, and video wall technology that meet the agency's product and performance requirement with "existing" system.

Products and services include:

- Consultation and space planning specific to emergency management concept of operations and latest industry methods and practices.
- Upgrade "existing" large video wall display system including separately placed large LCD/LED display panels and distributed audio.
- Upgrades include integration capabilities for facilities drawings viewing of Network facilities for Continuity of Operations if relocations are required.
- Installation of Hiperwall system to manage daily video dashboard for maintaining a current operation system that includes cameras, PCs, local media/TV, web content, presentations, and alerts to be integrated with future technology as it comes available. Eliminates hardware control of video and

audio inputs to web based server applications. Therefore reduces possibility of equipment failures, maintenance costs and down times.

- Increase capabilities to view multiple Satellite News Stations during a disaster of existing System presently installed.
- Upgrade Touch Screen to allow for speaker sound selections during activation of Command Center.
- This upgrade includes design, manufacturing and integration to integrate upgrades with existing System.
- Programming existing Hospital Command Center upgrades and screen selections to computers and lighting controls with previously purchased items.
- Project management.
- Delivery, installation and training.
- Warranties and service.
