

1. Will med gas walls be removed during normal working hours?

The contractor can remove the med gas walls during the day, but only if scheduled a minimum of a week in advance. Two of these in existing exam room/offices and this requires the prior notification/request.

2. Will ICRA standards be maintained during removal using outside exhaust.

Yes the ICRA standard will be followed throughout the project .

3. Will work in corridors be done at night and do temp. Walls for this work have to go to deck.

The contractor can work during the day if temporary dust wall partition is installed and maintained to keep debris and dust from entering outside in corridor areas.
