| 1 | | Discovery NM/CT 670 |
| 1 | S8000SF | <p>Discovery NM/CT 670 INTEGRATED SYSTEM SPECT/CT LOWER DOSE & BEYOND</p> <p>Discovery NM/CT 670 Integrated LOWER DOSE SPECT/CT Bone & BEYOND system solution brings together the new NM detectors, new wide bore gantry, and the BrightSpeed? Elite multi-detector CT with LightSpeed VCT? technology inside. This powerful combination provides high quality hybrid SPECT/CT, standalone NM, and standalone CT images across a wide range of applications with shorter acquisitions achieved via better efficiency, dose reduction and improved image quality. Included in this solution is the Xeleris 3 Processing and Review Workstation, which provides: - Volumetrix MI - a full processing & review package for non-cardiac tomographic imaging (single and multiple FOV) as well as hybrid SPECT-CT imaging & dual isotope imaging. - Volumetrix 3D - Volumetrix IR - Myovation - a full processing & review package for SPECT and SPECT/CT cardiac tomographic imaging. - Evolution for Bone - Evolution for Planar Bone - Evolution for Cardiac - Evolution Toolkit - Motion Detection & Correction software Also Discovery NM/CT 670 Integrated LOWER DOSE SPECT/CT & BEYOND system solution enables the ability to leverage a prior external GE CT for Attenuation Correction capabilities if required.</p> <p>Discovery NM/CT 670 Main Features Operator ergonomics All gantry operators of various heights and ensure visibility of the patient, -side controls are optimally positioned to support detectors and persistence display during scan setup.</p> <p>NM Detectors The integrated system includes two extra-large rectangular all-digital detectors with a 3/8" crystal for all-purpose nuclear imaging featuring five real-time corrections: o Uniformity o Linearity o Energy o Isotope decay o Center of Rotation (COR)</p> <p>3/8" Nuclear Detector Characteristics o 59 circular PMT's - 53 x 3" (76 mm) and 6 x 1.5" (38 mm) o Crystal Thickness: 3/8" (9.5 mm) o UFOV: 54 x 40 cm ? 0.5 cm o Energy Range: 40 - 620 keV</p> <p>Wide Bore Gantry Characteristics o Automated detector radial motion (in/out), rotation around the ring, transitions between 180? and 90? or other orientations. o Flexible design enables a variety of scanning orientations including upright seated or standing patients and imaging patients on stretchers. o The stationary gantry is optionally secured to the floor, increasing tomographic center-of rotation precision. o Camera setup is performed interactively by the remote control handset and via user definable pre-programmed acquisition-specific gantry modes. A gantry display screen displays the current status of the gantry's moving parts and the patient table. o Real-time, infrared-based Automatic Body Contouring (ABC) to enhance scanning efficiency and resolution in 90? & 180? SPECT, and Whole Body procedures. ABC enables minimizing patient-detector distance while maximizing image quality. o Hybrid and CT Stand Alone setup is performed using the CT panels including coronal, sagittal and transaxial lasers control and landmark set up o Integrated breathing lights and countdown timer</p> <p>Patient Table A dual-axis table is used for planar, whole body, SPECT and CT applications. Key patient table features include: o Whole body scans acquired in step & shoot simultaneous</p> |

| | | <p>anterior and posterior scans. o 53cm (21") minimum table height facilitates patient loading from wheelchair or stretcher o A low attenuation carbon fiber tabletop includes mattress pad/straps for maximum patient comfort.</p> <ul style="list-style-type: none"> Automated, flexible and accurate positioning during setup provides ease of use o Manual emergency egress of the patient before or during the scan. o Mobile design enables easy swiveling of the table away from the gantry on a pivot point at the rear, facilitating dual-collimator exchange and imaging of seated and stretcher patients, o Free access from both sides for patients loading / unloading with IV, EKG or other devices. <p>Acquisition Console The integrated SPECT-CT acquisition console employs a Graphic User Interface for exam scheduling, scan acquisition, CT reconstruction and scan QC as well as utilities for protocol editing and routine quality control and analysis In addition, the Bright Speed Elite CT desktop environment is available for CT imaging including: protocol definition, networking and archiving manual film control, as well as CT image processing such as multi-planar reformatting (MPR), multi ? projection volume rendering (MPVR) and MR image display. See BrightSpeed? Elite Product Data Sheet.</p> <p>Exam Scheduling and Scan setup o Faster patient setup and greater flexibility in patient positioning than preceding products through the use of: ~ Advanced Robotic motions ~ Fast, easy and reproducible automatic positioning ~ Automatic Body Contouring for SPECT and Planar Wholebody Imaging o Multi-scan protocols define the normal sequence of scans for the selected study protocol. Additional scans can be added. o Factory defined protocols are available to support all standard NM, SPECT-CT and CT clinical applications. o Preview of scan conditions including display of: ~ Energy spectrum for each detector including adjustment of the energy window ~ Persistence display during patient positioning (visible on the console as well as the gantry-side display). ~ ECG trigger signal display for quality control purposes</p> <p>Monitoring Acquisition o Synchronizing patient ECG trigger data with multi-gated nuclear image data framing o Storing the acquired data in the patient database o Online live display of: ~ Acquired data and imaging parameters ~ ECG trigger signal ~Gantry status including gantry position, and detector orientation o Progress and elapsed time o X-Ray exposure indicator</p> <p>Data Viewer o Threshold and windowing control in multiple window settings o Cinematic display and scroll of dynamic and all multi-frame datasets o Selection of display color maps</p> <p>Patient database o Collection of all NM and CT acquired data</p> <p>Scheduled Workflow Support ? Integrated Healthcare Enterprise (IHE) o To Do list ? includes patients scheduled automatically via Modality Worklist or manually (for emergency patients of for those sites without Modality Worklist) o Automatic or manual data transfer in DICOM 3.0 compatible format to network devices such as P & R workstations as soon as acquisition is completed o Storage Commitment support ? confirmed archiving to PACS and other storage systems</p> |

| 1 | E4502KY | <p>2 Phase 10 KVA Partial UPS for CT Lightspeed and Lightspeed PRO</p> <p>The 2 Phase 10 KVA Partial System UPS kit has been specifically designed to coordinate with the BrightSpeed, LightSpeed and LightSpeed PRO 16 families of CT scanners. In the event of a power outage, a partial system UPS provides continuous back-up power to the scanner host and control computers, thus assuring no loss of usable scan data. In addition, critical circuits in the gantry and table remain powered which facilitate the safe removal of the patient from the scanner. If power is restored within the battery hold-up time, the operator can continue scanner operations without the need to reboot the system. When longer power outages are anticipated, the UPS provides time for the operator to complete an orderly shutdown of the system software.</p> <p>FEATURES/BENEFITS</p> <ul style="list-style-type: none"> • True double-conversion, online technology provides reliable operation and uninterrupted glitch free power. • Automatic voltage and frequency selection eases startup, i.e., 50 or 60 Hz compatible • Integral Static Bypass switch means zero transfer time • Integral Manual Bypass switch facilitates continued scanner operation while UPS is being serviced • Single input connect utilized for both UPS input and static switch • Maintains system electronics and allows critical scanner operations to continue for 10 minutes (typical) after loss of power • Advanced Battery Management (ABM) software monitors / indicates battery health and doubles battery service life <p>SPECIFICATIONS</p> <ul style="list-style-type: none"> • Dimensions (H x W x D): 32.7" x 12" x 32" • Weight: 350 lbs. • Rating: 10 kVA • Input Voltage Range: 85-144V / ph; 2 Phase • Output Frequency: 50 or 60 Hz, auto-sensing <p>COMPATIBILITY</p> <ul style="list-style-type: none"> • HiSpeed Advantage-RP, CT/I, Lightspeed QXi, LightSpeed Plus, LightSpeed Ultra, LightSpeed 16, BrightSpeed Systems, LightSpeed Pro 16 and RT Systems, Discovery NM 670 (Nuc) <p>NOTES:</p> <ul style="list-style-type: none"> • Customer is responsible for rigging and arranging for installation with a certified electrician • ITEM IS NON-RETURNABLE AND NON-REFUNDABLE |

It also reduces installation time and cost by providing a single-point power connection eliminating the need to mount and wire a number of individual components. The standardized design and testing assures high product quality and system reliability, and it is UL and cUL listed for compliance with National Electric Code. Panel can be surface or semi-flush mounted and includes one remote emergency off push button. Customer is responsible for rigging and for arranging for installation by a licensed electrician. ITEM IS NON-RETURNABLE AND NON REFUNDABLE. Warranty Code: Y</p> |
| 1 | E8500NA | <p>Butterfly (R-Made) Armrest</p> <p>Designed to support a patient's arms during cardiac SPECT and other imaging procedures. Armrest offers new solution to motion artifact caused by the discomfort and pain of prolonged upper extremity hyperextension and abduction. Fast and easy to use, can be mounted and removed in one piece, and is tightly secured by adjustable mounting straps. Polyethylene construction is durable, nonbreakable, and easily learned. Measures 18 in. L x 14 in. W x 8 in. H; weighs 2.5 lb. Recommended for use with GE Optima Systems. Warranty Code H</p> |
| 1 | E8500PC | <p>3 Piece Leg Rest Set</p> <p>Set of three including: 5 in., 7 in., and 10 in. in height. Contoured Leg Rest prevents low back stress and pain that occurs during supine imaging and treatment. measures 7 in. H x 17 in. D x 13 in. W. Designed to accommodate virtually all patients. Compatible with most Nuclear Imaging systems and can also be used in MRI, CT and PET applications. Constructed with a comfortable, full support polyfoam with a seamless coated finish...H</p> |
