PROFESSIONAL AND TECHNICAL SERVICES					
8	3	Enterprise Project Management (per 8 hours of time) Enterprise Project Management is scaled to the scope of the project and installation. Provides a single point of contact for the customer and Agfa to coordinate all aspects of site survey, site preparation, network integration, modality integration, other information system integration, equipment installation and customer training. Schedules will be provided and timelines monitored. Regular customer meetings, which may be onsite or via teleconference are scheduled to review the schedule, budget and open issues. The project manager circulates minutes and action items from these meetings. The Project Managers are responsible to insure that all project and customer documentation is complete and delivered to the customer.	EOL37001
