RE: RFI for Solicitation VA244-12-B-0002, 480v Power Distribution / Project #503-10-123.

We are bidding the above referenced project as a prime bidder and request that the government answer the following question via amendment.

- BMEP is mentioned in section 26 32 13, paragraph 2.2 but a maximum BMEP value is not given. In the past on VA projects the maximum value has been 185 psi. Is there a max BMEP value for the gensets on this project?

Sincerely,

Duke Chapman
