CLARIFICATION # 3 - SFO # VA101-15-R-0022
Charlotte Hall, MD

1. SFO Para. 3.14.2 NET USABLE SPACE states “In all measurements, make no deductions for columns and projections enclosing the structural elements of the building. Deduct the following from the inside gross area, including the enclosing walls, to arrive at the figure for net usable square feet: 29% of inside gross area for corridors and circulation; yet the powerpoint presentation as part of Amendment #2 has 18%, instead of 29%. We will proceed on the basis that the amendment #2 figure of 18% supersedes the 29% noted in the SFO.

The PowerPoint presentation does not amend the requirements of the solicitation. Adhere to the requirements set forth in Section 3.14.2 of the Basic Solicitation Requirements.

2. In the conference, mention was made that the perimeter fence requirement would be removed. But the clarification does not mention the fence. If there is to be a fence, there is no definition about gates, openers, or times that the gates will remain open. Please clarify.

A perimeter fence is not required.
