Mold Remediation of Laboratory Administration Offices

VA Medical Center Orlando, Lake Nona

Questions and Answers Set #4

1. In reference to the Q&A responses provided in Amendment #5, question #2 where the question was asked “Can you provide an estimated square footage? How are contractors supposed to propose on an unknown?” The response was given “Given (drywall around these supply air registers) areas are not to exceed 100sq ft without prior approval of the CO.” In question #6 of the same Amendment, a question was asked “The requirement is to remove drywall around 4’ x 6” supply air duct in all the rooms with visible mold. Mold was not visible at the supply air registers during the time of the site visits. Will the VA concur with this statement? The response given was “YES”.
 - a. My question is why are we to include 100sq ft of drywall removal and replacement around supply air registers if mold was not visible?

We are repairing only what is on the PWS- Remove and dispose of approximately 300 LF moldy contaminated drywall 4 feet up from the floor (1200 sq. ft.), insulation, cove base, carpet, nails and screws etc. and HEPA Vacuum and Bio-Wash the marble sills that are 6.2” by 1.5” in each of the rooms.

Mold was not visible at the supply air registers-Yes

2. In reference to the Q&A responses provided in Amendment #5, question #5 where the question was asked “In reference to the Q&A responses provided in Amendment #4, question #4 where the question was asked “What is the scope for cleaning the AHU?” The response was given to clean “all ductwork leading up to AHU 14.” A. Will the VA provide a layout of the ductwork associated with AHU#14 so that we can properly price this requirement? The response was given “Mechanical Drawings already provided.”
 - a. As the requirement is to “clean all ductwork leading up to AHU#14” the drawings provided do not represent the entire ductwork system for AHU#14. Will the VA provide the remaining drawings for the complete ductwork system of AHU#14.

See attached Drawings: 2FD1, 2FD4, 2ND1, 2ND4, 3FD1, 3FD4, 3ND1, 3ND4, 4FD1, 4FD4 and 5FD2 (11 pages)
 - b. Is it required to clean all mains, branches and VAV/Reheat boxes, registers associated with the AHU#14 ductwork system? If not, will the VA delineate on the provided drawings the scope required?

Yes, all areas shall be done.
