

S02_Unit Pricing

Include unit pricing for repairing the existing walls indicated to be a smoke partition as identified on the Life Safety Plan. Unit pricing shall be provided for each of the following:

1. Cost of repairing each wire or conduit penetration less than 3-inches in diameter to be smoke tight:

At \$_____ per penetration.

2. Cost of repairing each conduit or pipe penetration greater than 3-inches in diameter to be smoke tight:

At \$_____ per penetration.

3. Cost of repairing each opening in the wall to be smoke tight:

At \$_____SF of opening.

4. Cost of extending the existing wall to the underside of the construction (approximately 3-feet) with the equivalent of wall type S3.B1 (less sound attenuation) and constructing it to be smoke tight:

At \$_____LF of wall.
