

REQUEST FOR INFORMATION

VISN 23 is requesting information for companies who offer the following goods or equivalent. **THIS IS A REQUEST FOR INFORMATION (RFI) ONLY:** The market research is looking to identify potential vendors who have the capabilities to offer the following:

General Equipment Name: Computerized Visual Therapy System

Description & Salient Characteristics

Computerized Visual Therapy System HTS SVI Sanet Integrator –

Computerized Visual Therapy is used to enhance eye-hand coordination, visual reaction time, and central-peripheral integration.

Tactile Feedback- Uses the hand rather than a keyboard or laser pointer so the patient gets “real life” tactile and proprioceptive feedback.

Hand Speed Function - Used in the Sports Vision Evaluation of Olympic athletes. Useful in therapy for Sports Vision both to measure and increase visual reaction time and hand speed

‘Visual Search’ Saccadic Function - Unlike saccadic procedures like the Hart Chart, the SVI Saccade 2 Function simulates real life where the majority of saccades are not to an anticipated fixed point in space, but rather to “unexpected” events in the environment.

Metronome Function- Helps all patients to enhance rhythm and timing and visual-auditory integration

Tachistoscope Functions – Helps to increase speed of both visual and auditory information processing and memory.

Must – Include the following:

- SVI Sanet Integrator
- 50” Touch Screen Monitor
- VTS Computer Orthopedics with 48” 3D TV
- Windows 7 Computer with GE-Force GT 730 Video Card – Computer is part of the system and is stand alone and will not connect to a Government Network.
- BVA Binocular Vision Assessment
- PTSII iNet Kit
- PTS Test

NAICS CODE: 339112

Product Service Code: 6515 Medical Equipment

If your company sells the Equipment listed above please contact me at Lance.Haman@va.gov and provide the following information and any additional information that you deem pertinent:

Company Name	POC	Phone Number	Email Address	Product(s)	Duns	Business Size

DISCLAIMER
