

Prime TC[®]

Transport Chair

Patient Transport **Redefined.**

When it comes to the patient experience, details matter. That is why every aspect of the Prime TC Transport Chair is designed to create a **welcoming and safe environment that speaks volumes to caregivers, patients and their family members.** Obvious touchpoints help make operation intuitive for all users. BackSmart[®] ergonomics have been incorporated into the design to reduce the bending and reaching associated with caregiver injury. A rigid frame helps enhance durability while reducing the risk of theft. This investment in the well-being of patients and caregivers tells them you care about their comfort and safety – it tells them that they matter.

Flip-up Footrests help reduce trip hazards by providing a clear path of patient ingress and egress.

Foot-operated Swing Away functionality enhances access to the patient and closer positioning to beds, cars or tables.

BackSmart Push Handles help enhance caregiver safety by allowing caregivers to position their elbows at an ergonomic 90-degree angle and accommodate caregivers of virtually any height.

Optional Leg Supports are permanently attached for comfortable elevation in a fixed upright position. Easily stow away when not in use.

Big Wheel[®] maneuverability helps make steering and cornering easier.

One-touch central brake reduces bending and reaching while enhancing caregiver efficiency.

Stand Assist Armrests provide a raised and extended touchpoint for patient ingress and egress.

Rigid, nestable frame helps prevent theft while preserving valuable floor space.

Designed for cleanability, the chair frame consists of seamless components that are easy to disinfect and are power-washable.*

Yellow activation points make operation intuitive for all users.

Movable, but not removable, components help reduce the risk of lost or stolen parts.

500 lbs. safe working load accommodates even heavy patients.

Durable 1" thick IV pole is chrome-plated to prevent rust and features enclosed hooks for safety.

Upright O₂ tank holder helps minimize bending and lifting required to place a heavy O₂ tank underneath the chair.

*Chairs with the optional padded seat are not power washable.
