BUILDING. TYPICAL FOR ALL FLAT ROOFS.

 = DOWNSPOUT CLEAN-OUT LOCATION
  = THERMOSTAT CONTROLLED ATTIC FAN LOCATION

 = DOWNSPOUT WITH OUT CLEAN-OUT LOCATION
  = PORCH POST LOCATION

CONSTRUCT A HIP ROOF OVER EXISTING
FLAT ROOF TO MATCH ADJACENT
ROOFING ON BUILDING. 3:12 MIN. SLOPE.

Architectural site plan of a rectangular building. The plan shows a large central hall with a cross symbol in the center, flanked by two circular rooms. To the left is a large rectangular room with a diagonal line. To the right is a smaller rectangular room. The building has a total width of 73' and a total depth of 18'. The right side has a 12' wide section and a 10' wide section. The bottom section has a 32' wide section and a 7' wide section. The plan includes various structural details such as columns, walls, and doors. A note at the bottom left indicates a roof over existing structure with a 3:12 min. slope.
