RealEyes™

Video Goggles

REALEYES MONOCULAR VIDEO GOGGLES ARE IDEAL FOR EYE MOVEMENT OBSERVATION AND RECORDING.

RealEyes utilizes Micromedical's proprietary camera design. The ball and socket camera to goggle interface allows the flexibility to adjust for interpupillary distance and move the camera to record eye movement from either eye.

OTHER KEY FEATURES INCLUDE:

- MICROPHONE FOR AUDIO RECORDING
- FIXATION LIGHT
- EXTERNAL FOCUS KNOB
- COMFORTABLE LIGHT TIGHT GOGGLE

REALEYES MONOCULAR

These video goggles are configured with a single camera and comfortable light tight goggles.

Easily observe and video record one eye during assessment of the dizzy patient or while performing Canalith Repositioning Maneuvers. The infrared sensitive camera produces exceptional image clarity.

RealEyes[™] XDVR

Video Goggles

A TWIST ON OUR RELIABLE AND POPULAR REALEYES VIDEO GOGGLES, THE REALEYES XDVR IS CONFIGURED WITH SOFTWARE AND A LAPTOP COMPUTER.

REALEYES XDVR BINOCULAR REALEYES XDVR DIGITAL VIDEO SOFTWARE

We've written special software for this product to allow you to input patient demographics and digitally record eye movement videos. The software also controls the built-in fixation light and allows single click centering of the eyes.

REALEYES XDVR MONOCULAR

Real Eyes Monocular XDVR video goggles are ideal for eye movement observation and recording during Canalith Repositioning Maneuvers or BPPV Therapy.

Display and Record your patient's eye movement videos directly to your PC. An optional room camera provides a picture - in - picture display on the monocular model.

REALEYES XDVR FOUR BUTTON REMOTE

The four button remote allows you to center the eyes on the screen with a single click of a button while other buttons allow you to progress through the nystagmus tests without returning to the keyboard to move from test to test.
