2.3. Implementation Services

#	Qty	Description
		Services by Agfa Healthcare
	8.00	Project Management
	16.00	Application Training
	5.00	Technical service training for onsite department service personnel to be held at an Agfa training facility. This training course is intended for a BMET technician with responsibility for installation, preventive maintenance and general service of Agfa Healthcare DR products. Customers are required to schedule this training within 12 months of PO issuance. Quantity of 1 is equivalent to 1 day of training. Which ranges from 3-5 based on equipment purchased. Travel, Lodging, and meals are separate but may be purchased in advance for your convenience. In addition to onsite department service training, Agfa offers and recommends Support Level Agreements (SLA) to include Training, Remote Support, Parts, and Escalation Support in order to provide the most comprehensive and cost-effective service possible for our DRcustomers.
		<i>Covers NX Technical & Applications prerequisite course (5 days).</i>
