

1 - SonoSite Edge II Ultrasound System

The SonoSite EDGE II is a high-resolution, all-digital, 9.0-pound (4.1 kg) ultrasound system with a 12.1in. LED full-bleed glass display. The Edge II boosts improvements in cardiac and abdominal image quality through DirectClear Technology and a new wide-angle display, as well as alignment with the SonoSite pillars. The Edge II features Armored Cable Technology on select transducers, a keypad sealed to the Edge for protection against infection, and persistent knobs for more precise actions. As with our past products, the Edge II is designed with SonoSite's proprietary Chip Fusion Technology that integrates digital signal processing and multiple system functions into a custom application-specific integrated circuit (ASIC) microchip.

1

The purchase of the SonoSite EDGE II system includes the following software technologies:

- 2D grayscale with SonoMB Multi Beam Technology
- Auto Gain with SonoADAPT Tissue Optimization Technology
- M-Mode
- Application specific calculation packages

SonoSite EDGE II's reliability and durability are backed by a five-year standard warranty, which is included in the price of the system. Software upgrades to the main system and transducer databases are accomplished through one of two USB ports on the system. Also includes battery, ultrasound gel, and user guide on a CD (Printed user guides also available as a purchasable option).

Included with the purchase of your SonoSite EDGE II, you will receive four consecutive hours of installation provided by a SonoSite Clinical Specialist. The installation includes an overview of the product and accessories purchased, training on the features, functions, and user interface, and system care/maintenance. Available for US locations only. Additional clinical installation support can be purchased separately as needed.

Serial No:One (1) User Manual is included in the line #1 ship kit.

2 - Color Application Package, SonoSite EDGE II

1

This package provides the following capabilities for the transducers that support these features:

| | | |
|---|--|---|
| | <ul style="list-style-type: none"> - Tissue Harmonic Imaging (THI): Capability in which the system transmits at one frequency and receives at a higher harmonic frequency to reduce clutter and improve resolution. - SonoHD Imaging Technology: Significantly reduces speckle noise while enhancing tissue margins, thereby dramatically improving contrast and structural resolution. - Velocity color flow imaging provides the clinician with the color sensitivity to perform color Doppler examinations with all transducers during a clinical procedure. - PW Doppler is available on all transducers. - CW Doppler is a quantitative assessment of blood flow with Duplex imaging for higher flow velocities. | |
| 3 | <ul style="list-style-type: none"> - DICOM (Print, Store, Worklist, MPPS, Storage Commit) <p>The DICOM package includes the capability to interface with your PACS network with the complete off-line DICOM capabilities: print, store, worklist, storage commit, and modality perform procedure step.</p> | 1 |
| 4 | <ul style="list-style-type: none"> - ACO Technology <p>Automated Cardiac Output enables the clinician to rapidly assess quantitative cardiac output information and eliminate the need to manually navigate through complex measurement packages. Note: PW and/or CW is required when purchasing this option.</p> <p>Serial No:Automated Cardiac Output (ACO)</p> | 1 |
| 5 | <ul style="list-style-type: none"> - L38xi / 10-5 MHz transducer Biopsy Compatible <p>L38xi / 10-5 MHz multi-frequency, broadband, 38 mm linear array transducer. This transducer is suitable for biopsy applications.</p> <p>Note: Please refer to the most recent version of the corresponding system specification sheet or transducer specification sheet for available exams supported by each system.</p> <p>Serial No:High frequency linear transducer for regional nerve blocks, vascular access, lung, breast, gen. surg., vascular, msk and small part scanning.</p> | 1 |
| 6 | <ul style="list-style-type: none"> - rP19x / 5-1 MHz Transducer <p>rP19x / 5-1 MHz multi-frequency, broadband, 19 mm phased array transducer featuring DirectClear technology (patent-pending transducer design that increases resolution and penetration without compromising SonoSite's renowned durability).</p> <p>Note: Please refer to the most recent version of the corresponding system specification sheet or transducer specification sheet for available exams supported by each system.</p> <p>Serial No:Phased (sector) array transducer. Abdominal, Cardiac, Lung and greater organ scanning applications.</p> | 1 |
| 7 | <ul style="list-style-type: none"> - rC60xi / 5-2 MHz transducer <p>rC60xi / 5-2 MHz multi-frequency, broadband, 60 mm curved array transducer featuring DirectClear technology, (patent-pending transducer design that increases resolution and penetration without compromising SonoSite's renowned durability).</p> | 1 |

Note: Please refer to the most recent version of the corresponding system specification sheet or transducer specification sheet for available exams supported by each system.

Serial No:Curvilinear Transducer

|----|--|---|
| 8 | - EDGE Stand Ergonomic stand and mobile work platf EDGE, SonoSite EDGE II system and tr . Complete with power supply, mini-dock and accessory basket. OEM peripherals include: B/W or color printer. Unable to use together | 1 |
| 9 | - Wireless Data Management This kit includes the USB dongle that is used to transmit images and information wirelessly and installation instructions. | 1 |
| 10 | - Powerpark System PowerPark docking station for the Universal stand. This stand module and docking station allows the ultrasound systems to charge without plugging in the power cord. Serial No:Cordless floor charging station with large LED icon clearly showing the SonoSite system is docked & charging. Easily moved aside for floor cleaning, the Powerpark eliminates having to remember to plug the ultrasound into an AC Power source when idle. | 1 |
| 11 | SonoSite EDGE II Ultrasound System User Guide English | 1 |
| 12 | - SonoSite EDGE II Ultrasound System Service Manual | 1 |
| 13 | - SonoSite EDGE II Ultrasound System Service Manual | 1 |
| 14 | - ECG Option 6 ft. (1.8 m) cable connects to I/O port on the side of SonoSite 180/ ELITEsystem or into the ECG port on the back of TITAN/MicroMaxx/M-Turbo/EDGE or into the ECG port on the back of TITAN/MicroMaxx/M-Turbo/EDGE mini-dock. Allows for display of ECG trace on LCD monitor. Includes a 2 ft. 3 leadwire set, for a total cable length of 8 ft. | 1 |
| 15 | Triple Transducer Connect (TTC) w/ quick disconnect Three-transducer module for mobile docking system that allows connection of up to three transducers simultaneously while the system is docked in the Stand Serial No:This multi-transducer portal permits push button selectivity of each transducer. Prevents misplaced tr .Reduces "wear & tear" on connectors. | 1 |
| 16 | 5-YR-WARRANTY - 60 MONTHS - STANDARD COVERAGE WARRANTY 60 MONTHS - STANDARD COVERAGE WARRANTY | 1 |

Serial No: ultrasound system, performance applications software and all
transducers, including dropped transducers.
Please refer to Warranty Schedule.
