PROFESSIONAL AND TECHNICAL SERVICES							
2	.25	Project Management Implementation Services (per 8 hours) Essential Project Management Provides a single point of contact between the customer and Agfa to coordinate all aspects of site survey, site preparation, network integration, modality integration, other information system integration, equipment installation and customer training. Ensures appropriate timelines are set and adhered to, which will satisfy the requirements of a successful system installation. Schedules will be provided and timelines monitored. Regular customer meetings, via teleconference are scheduled to review the schedule, budget and					

		open issues. The project manager circulates minutes and action items from these meetings. Project managers are responsible to insure that all project and customer documentation is complete and delivered to the customer.
