### **Sorna Vertex System – Advanced Exchange Maintenance**

This maintenance is an exceptional value for facilities with their own technical staff familiar with the basics of Windows® operation systems, PC hardware and peripherals who utilize Sorna's Partners for on-site or remote Technical Support.

**Sorna requires remote access into the Vertex system(s) under this maintenance agreement.**

#### ***The maintenance consists of three:***

1. Technical support – The Partner (the Sorna reseller from whom the end user has purchased the system) must be the party contacting Sorna requesting support.
2. Free software upgrades – At Sorna's requirement, or end users' request and with Partner's approval, new revisions of functionally equivalent software will be made available at no charge.
  - a. The labor for upgrading and configuring the new software and possible customer training of the new software is charged at the standard Professional Technical Services rate.
  - b. The end-user is responsible for any hardware and or Operating Systems upgrades that may be necessary for upgrading to Vertex.
3. Hardware Advanced Exchange – The following rules apply:
  - a. Customer is to contact the Partner as soon as the problem occurs.
  - b. If necessary, Partner will contact Sorna Technical Services.
  - c. Sorna will attempt to diagnose and resolve the problem remotely with assistance from the customer and Partner's technical staff.
  - d. If the problem is not resolved, and it is prior to 12:00 pm Central Time, Sorna will provide a new / refurbished unit to the customer for their installation the next business day\*.
  - e. Sorna Technical Services personnel must be provided with service diagnostics to validate replacement request.
  - f. Customer must return the faulty unit to Sorna within 5-business days at their own expense unless the product is classified as a recall or retrofit.
  - g. Customer keeps the replacement unit and Sorna keeps the returned unit.
  - h. Routine maintenance exclusions include, but are not limited to:
    - i. Changing of ribbons / print cartridges
    - ii. Clearing of jams
    - iii. Cleaning print-head / ink cartridge and drive(s)

- iv. Print-head / ink cartridge and drive replacements
- v. Malfunctions due to equipment relocations
- vi. Malfunctions caused by misuse or abuse of the system
- i. The PC server is maintained under the same rules as above.
  - \* Units not in stock will be shipped on a commercially reasonable effort basis, typically within 48 hours of order request.
