		UroNav Fusion Biopsy System				
		<p>UroNav is an integrated, image-guided stereotaxic system that uses magnetic resonance (MR) and ultrasound (US) images in conjunction with electromagnetic (EM) tracking devices to plan, guide and document clinical interventions. The system provides real-time, three-dimensional visualization and navigation for pre-operative planning and intra-operative navigation of minimally-invasive interventional procedures. UroNav is a DICOM-compliant system that integrates with Picture Archiving and Communication System (PACS) networks and Invivo's DynaCAD MRI platform (sold separately). UroNav includes a mobile procedure cart, computer hardware/software, an electromagnetic navigation system, interface hardware, procedure kit, installation, applications/training and a one (1) year limited warranty.</p>

	DYNACAD 3 PROSTATE DIAG ONLY SERVER SOFTWARE				
	Part Number - 9896-032-09662				
	*** This component includes prostate diagnostic server software only. DynaLOC interventional planning software is available seperately. ***				
	DynaCAD 3 Prostate Software is a two concurrent user client-server software application. Any server computer that meets the server minimum software and hardware requirements can be used as a DynaCAD 3 server.				
	Any computer that meets the client minimum software and hardware requirements can be used as a DynaCAD 3 client.				
	The DynaCAD 3 application allows unlimited clients to be installed but use is restricted to two users at a time. Additional concurrent users can be purchased with the "DynaCAD 3 Additional Concurrent Users" option.				
	Clients throughout the enterprise have access to the DynaCAD 3 advanced feature set including:				
	- Software-only package				
	- OS virtualization ready*				
	- Multi-vendor compatibility				
	- Fully automated processing for streamlined workflow				
	- Advanced motion correction				
	- One click lesion segmentation				
	- Image MIP and MPR reformatting				
	- Automatic Prostate gland segmentation
