

Project 541-06-1018 Renovate Surgery Intensive Care Unit (SICU)

This project will complete the renovation of the existing SICU located on the 2nd floor of the Medical Center. The renovation will include replacement of existing ~~25-year-old~~ infrastructure including plumbing systems, electrical systems, HVAC systems and final finishes in the project area. A significant portion of this project was originally constructed before the project was placed on hold. The finished project will provide a functional and complete SICU. The contractor shall furnish all labor, materials, tools, equipment, and supervision necessary to accomplish all work as provided in the contract documents, drawings, and design specifications. The period of performance is 150 calendar days after issuance of the Notice-to-Proceed (NTP).
