

## VISN 23 Radiology Ultrasound - Summary

- This procurement includes a total of 43 Radiology Ultrasounds units for 11 different locations allocated within VISN 23.
- These ultrasounds will be used for the following clinical applications: General purpose, abdominal, small parts, guidance for interventional procedures, and vascular.
- Please review each of the specification documents carefully – the base unit requirements will be the same but some units will require additional features, functions, training, etc.
- It will be determined if presentations and/or demonstrations are necessary once the bids have been received and reviewed by the evaluation team. The VISN 23 evaluation team consists of clinical and technical representatives from all sites. If it is determined that presentations and/or demonstrations are necessary then any vendors submitting proposals will be asked to present about their proposal. The presentations may take place virtually or in person.

This table represents the high-level review of unique requirements for each system:

Facility Name	PO number	Navigation/ Fusion Software	Navigation/ Fusion Biopsy guide	Phantom	Offsite Sonographer training	Biomed training	Trade In
