O: (516) 656-3238

Stryker interprets the Trade Agreements Certificate and FAR 52.225-5, Trade Agreements, to apply solely to the end products required by the terms of the Solicitation. In this regard, the Solicitation seeks pricing for “prosthetic implants,” which has been defined to include among other products “hips, knees, shoulders, [and] elbows” rather than the parts that make up each prosthetic joint. Accordingly, in completing the Trade Agreements Certificate and for purposes of compliance with FAR 52.225-5, we have interpreted the Solicitation to mean that the end product is each complete implant, e.g. each hip, knee, shoulder, etc.; and the individual parts and line items that may be selected by the physician during surgery and any instrumentation or auxiliary items necessary to insert each implant are not end products. Further, we base the Trade Agreements Certificate and FAR 52.225-5 compliance obligations on the interpretation that the surgeon’s selection of the parts and integration thereof into a functioning implant confers status as a U.S.-made end product or designated country end product. The country of origin of any individual part or line item will be provided upon request. Consistent with the above, however, these parts may not be purchased by the government separate from its purchase of the complete prosthetic implant.

In addition, in accordance with FAR 52.225-3, which Stryker believes applies to the acquisition of Open Market items listed in this Quotation, Stryker declares that the Open Market items listed herein may be a foreign end product.
