

RFI 4

1. Are we to bid ONLY as solicited using identified lighting control requiring class 2 wiring installation? [Solicitation allows for multiple proposals therefore offerors can submit alternate methods and pricing if they are clearly defined and priced.](#)
2. Is any alternate a post award value engineering option or part of the bid submission? [No](#)
3. Are we allowed to provide the alternate pricing for CAT5 lighting controls as part of the bid and if so: [Yes](#)
 - a) consider extending deadline to allow for development and pricing of alternate; [Extended until 2 Aug 2017 at 2:00PM MT.](#)
 - b) will a new bid schedule be provided to accommodate alternate or how should that be included? [Yes, see attached revised bid schedule](#)
 - c) how much information regarding the alternate do you want? [Enough so the Government/A&E can evaluate and determine if acceptable.](#)
 - d) how would we or the VA know that the alternate lighting meets the design intent? [The VA would use the A&E to assist in evaluation. The offeror needs to do their own evaluation using drawings and Specifications.](#)

We would also like to clarify the revised bid schedule from AM00006: [See Attached Revised Bid Schedule](#)

Item Number 0001d Stairs: all lights and controls in all stairwells: Please confirm that this scope is not a part of Item Number 0001 [See Attached Revised Bid Schedule](#)

Item Number 0001e Drawing E-001 deduct for Stair Tower Fixture Replacement: This appears to be the same scope as the Alternate Addition 0001d, is this correct? We were confused by the differing description within the 2 item numbers, 0001d and 0001e. [See Attached Revised Bid Schedule](#)
