SURVEILLANCE PLAN FY18**

**QUALITY ASSURANCE SURVEILLANCE PLAN
FOR
Contracted Emergency Residential Services (CERS)
INTRODUCTION**

This Quality Assurance Surveillance Plan (QASP) has been developed to evaluate contracted programs' activities while implementing this Statement of Work (SOW). It is designed to provide an effective surveillance method of monitoring Contractor performance..

The QASP provides a systematic method to evaluate the services the Contracted Program is required to furnish.

This QASP is based on the premise, the Government desires to maintain a quality standard in providing emergency housing and supportive services to its patients. The resulting contract is considered the best means of achieving that objective.

PURPOSE

The Contracted Program, and not the Government, is responsible for management and quality control actions to meet the terms of the contract. The role of the Government is quality assurance to ensure contract standards are achieved.

This QASP does not detail how the Contracted Program accomplishes the work. Rather, the QASP is created with the premise that the Contracted Program is responsible for management and quality control actions to meet the terms of the contract. It is the Government's responsibility to be objective, fair, and consistent in evaluating performance. In this contract the quality control program is the driver for product quality. The Contracted Program is required to develop a comprehensive program of inspections and monitoring actions. The first major step to ensuring a "self-correcting" contract is to ensure that the quality control program approved at the beginning of the contract provides the measures needed to lead the Contracted Program to success. This QASP explains the following:

- What shall be monitored.
- How monitoring shall take place.
- How often monitoring shall take place.
- Who shall conduct the monitoring.
- How monitoring efforts and results shall be documented.

This QASP is a "living document" and the Government may review and revise it on a regular basis. However, the Government shall coordinate changes with the Contracted Program. Copies of the original QASP and revisions shall be provided to the Contractor and Government officials implementing surveillance activities.

Once the quality control program is approved, careful application of the process and standards presented in the remainder of this document shall ensure a robust quality assurance program.

PERFORMANCE STANDARDS

Performance standards define desired services. The Government performs surveillance to determine if the Contracted Program exceeds, meets or does not meet these standards. The Performance Requirements Summary Matrix is incorporated within this QASP to include performance standards and disincentives. The Government shall use these standards to determine Contracted performance and shall compare Contracted performance to the Acceptable Quality Level (AQL) defined below for each performance requirement.

SURVEILLANCE: The Government quality assurance (QA) person and the COR shall use the surveillance methods listed below in the administration of this QASP.

- a. Direct Observation. Direct observation shall be performed periodically or through 100% surveillance. All Performance Standards
- b. Periodic Inspection. Evaluate outcomes on a periodic basis. Inspections may be scheduled Daily, Weekly, Monthly, Quarterly, Annually or unscheduled, as required. All Performance Standards
- c. Progress or status meetings. All Performance Standards
- d. Complaints. Complaints from agency personnel shall be passed to the Contractor's quality control inspector (QCI) for correction. All Performance Standards

STANDARD: Customer complaints shall not exceed the thresholds cited above for each performance objective. The Government's QA personnel shall notify the contracting officer for appropriate action in accordance with FAR 52.212.4, Contract Terms and Conditions-Commercial Items (May 1997) or the appropriate Inspection of Services clause, if any of the above service areas exceed the customer complaint thresholds.

DOCUMENTING PERFORMANCE

- a. Acceptable Performance: The Government shall document performance. Any report may become a part of the supporting documentation for any contractual action.
- b. Unacceptable performance: When unacceptable performance occurs, the COR shall inform the Contractor. This shall normally be in writing unless circumstances necessitate verbal communication. In any case the COR shall document the discussion and place it in the COR file.

When the COR determines formal written communication is required, the COR shall prepare a Contract Discrepancy Report (CDR), and present it to the Contracting Officer (CO). In turn, the CO shall present the CDR to the Contractor's contracting personnel.

The Contractor shall acknowledge receipt of the CDR in writing. The CDR shall specify if the Contractor is required to prepare a corrective action plan to document how the Contractor shall correct the unacceptable performance and avoid a recurrence. The CDR shall also state how long after receipt the Contractor has to present this corrective action plan to the COR. The Government shall review the Contractor's corrective action plan to determine acceptability.

Any CDRs will become a part of the supporting documentation for any contractual action deemed necessary by the CO.

SURVEILLANCE: The Government evaluator shall evaluate the services required by each delivery/task order to ensure complete compliance.

PROCEDURES: The Government evaluator shall inspect to ensure Contractor compliance with the appropriate section of the Statement of Work (SOW) periodically. The evaluator shall record results of inspection, noting the date and time of inspection. If inspection indicates unacceptable performance, the Government evaluator shall notify the CO and/or QCI of the deficiencies within 3 business days and have QCI correct said deficiencies. Contractor shall be given notification to correct the deficiencies within a reasonable amount of time, on a case-by-case basis. The CO shall have the final authority on the amount of time the Contractor has to correct the deficiency. The evaluator shall not issue a receiving report accepting the services for the month in question until all deficiencies have been corrected.

FREQUENCY OF MEASUREMENT: During contract performance, the COR shall periodically analyze whether the negotiated frequency of surveillance is appropriate for the work being performed. Performance Assessment Meetings will be conducted quarterly. The Government may, at its discretion, choose any time, announced or unannounced, to have VA personnel inspect the contractor's files

The COR shall meet with the Contractor quarterly to assess performance and shall provide a written assessment.
