332/334/336 Traditional Delivery System

[Request a Quote](#)

A-dec 332/334 Traditional Delivery System - Compact in size. Big in function. Both the traditional and Continental delivery systems can integrate a quad-volt intraoral light source and two ancillaries. With the option of a Radius-style delivery system, you not only gain a dynamic arc for left- and right-handed operators, but you're also accommodating a wide range of work styles today and for the future.

- Chair base-mount, support-mount or Radius-style system
- Choice of standard, deluxe or no touchpad
- Balanced flexarm with air brake (332/334) or manual height adjustment (336)
- Balanced flexarm with air brake
- Optional quad-voltage intraoral light source with independent adjustment settings for 4 positions
- Can be configured for right or left-handed dentistry
- 4 whip assemblies (optional fifth)
- 3-position or optional 4-position handpiece control block
- Control head accommodates 2 ancillary control modules
- Choice of autoclavable QD syringe, autoclavable warm water syringe or no syringe
- Wet/dry foot control
- 2.0 liter self-contained water bottle (Radius)
- 15' USB 2.0 cable from control head to chair
- Large or small tray holders
- Easily replaceable cartridges for simplified maintenance
