

SUMMARY OF CHANGES

39. Sections 019100 DEMONSTRATION & TRAINING and 1.21 PHOTOGRAPHIC DOCUMENTATION. The specs indicate that a professional is required for the Owner Training Recording, but no reference is made to professional services for the 1.21 section - will professional photography be required?

The requirement for a "professional photographer" is only for the "demonstration and training recordings", of Section 019100. And it's really for "videos", not photos. Its so the quality will be good enough and train the staff several years later. General Conditions Section 10000 – Paragraph 1.21 DOES NOT REQUIRE a professional photographer for the construction documentation photos. Anybody (the GC's super or PM) could do it.

40. We were wondering what the ceiling height is in the crawl space? Does it have a concrete floor?

The crawl space has a dirt floor. There is not a consistent height although it is accessible and most is walkable except for areas obstructed by piping.

40. Does the 6" CHW (page MP100 Alternate 7 Basement plan) go down to the sub - basement tie into an existing main or does it need to tie into main at the same spot the 12" is in the base bid? Nothing is provided on drawings noting where this tie in is. Please advise.

Does the 6" CHW (page MP100 Alternate 7 Basement plan) go down to the sub - basement tie into an existing main or does it need to tie into main at the same spot the 12" is in the base bid? Nothing is provided on drawings noting where this tie in is. Please advise.

41. Sheet TN102 shows an area called #Alternate #5" The note at the top upper right of the prints says Alternate #1. Is this just a typo?

Yes. This is a typo. The heading for the notes in the upper-right hand corner of sheet TN102 should read "Alternate #5".
