B.2 LIMITATIONS ON SUBCONTRACTING-- MONITORING AND COMPLIANCE (JUN 2011)

This solicitation includes VAAR 852.219-10 VA Notice of Total Service- Disabled Veteran-Owned Small Business (SDVOSB) set aside. SDVOSB registration will be verified in System Award Management (SAM), Small Business Administration (SBA) and Vendor Information Pages (VIP). Proposals will be considered nonresponsive and rejected if the Contracting Officer is not able to verify and view contractor registrations. Accordingly, any contract resulting from this solicitation will include this clause. The contractor is advised in performing contract administration functions, the CO may use the services of a support contractor(s) retained by VA to assist in assessing the contractor's compliance with the limitations on subcontracting or percentage of work performance requirements specified in the clause. To that end, the support contractor(s) may require access to contractor's offices where the contractor's business records or other proprietary data are retained and to review such business records regarding the contractor's compliance with this requirement. All support contractors conducting this review on behalf of VA will be required to sign an "Information Protection and Non-Disclosure and Disclosure of Conflicts of Interest Agreement" to ensure the contractor's business records or other proprietary data reviewed or obtained in the course of assisting the CO in assessing the contractor for compliance are protected to ensure information or data is not improperly disclosed or other impropriety occurs. Furthermore, if VA determines any services the support contractor(s) will perform in assessing compliance are advisory and assistance services as defined in FAR 2.101, Definitions, the support contractor(s) must also enter into an agreement with the contractor to protect proprietary information as required by FAR 9.505-4, obtaining access to proprietary information, paragraph (b). The contractor is required to cooperate fully and make available any records as may be required to enable the CO to assess the contractor's compliance with the limitations on subcontracting or percentage of work performance requirement.

B.3 REGISTRATION WITH CONTRACTOR PERFORMANCE ASSESSMENT SYSTEM (CPARS)

a. As prescribed in Federal Acquisition Regulation (FAR) Part 42.1502 and 42.1503, the Department of Veterans Affairs (VA) evaluates contractor past performance on all contracts that exceed \$150,000. The FAR requires that the Contractor be provided an opportunity to comment on past performance evaluations prior to each report closing. To fulfill this requirement VA uses an online database, Contractor Performance Assessment System (CPARS), which is maintained by the Naval Sea Logistics Center in Portsmouth, Virginia. CPARS has connectivity with the Past Performance Information Retrieval System (PPIRS) database, which is available to all Federal agencies. PPIRS is the system used to collect and retrieve performance assessment reports used in source selection determinations and completed CPARS report cards transferred to PPIRS. CPARS also includes access to the Federal Awardee

Performance and Integrity Information System (FAPIS). FAPIS is a web-enabled application accessed via CPARS for contractor responsibility determination information.

b. The Contractor will have an opportunity to review their ratings/comments, under the step “Contractor Comments” in CPARS. You will be notified via email by the CPARS system to review the report and provide comments. Each contractor whose contract award is estimated to exceed \$150,000 may register with CPARS database at the following web address: www.cpars.gov in order to review the past performance evaluations. Help in registering can be obtained by contacting Customer Support Desk @ DSN: 684-1690 or COMM: 207- 438-1690. Registration should occur no later than thirty days after contract award, and must be kept current should there be any change to the Contractor's registered representative.

B.4 PERFORMANCE WORK STATEMENT (PWS)

PERFORMANCE WORK STATEMENT (PWS)

Marking and Commissioning of Medical-Surgical and Dental Instrumentation VETERANS

HEALTH ADMINISTRATION – VISN 16

1. Introduction

1.1 Purpose

Censitrac is a Dental and Medical-Surgical instrument and reusable medical equipment (RME) tracking solution developed by Censis Technologies, Inc. (Censis). Censitrac has been installed in multiple Veteran Integrated System Network (VISN) VA Medical Centers (VAMCs). All instruments require a 2-dimensional data matrix that uniquely identifies the instrument. The marking or stencil is applied by a marking station supplied by Censis and then details about the instrument are entered into the Censitrac database. As the instrument travels through the sterilization process, the electrochemical mark is scanned such that the instrument can be tracked through the process. Some instruments cannot be marked based on chemical, surface, electromagnetic, or material characteristics of which the instruments are made and these instruments are instead supplementary marked with a “dot” or “tape” which contains a pre-printed 2D matrix barcode on a small surface with a semi-permanent adhesive backing. These supplementary dots/tapes withstand repeat sterilizations without adverse effect.

The contractor shall initiate/complete the implementation of their Censis System with completion of marking and commissioning services for the instrument inventory. This requirement establishes the requirements for the scope of services required for VISN 16 and its facilities (See Attachment) to finalize all marking and commissioning of dental and medicalsurgical instruments utilizing VA developed data standards and guidance.

1.2 Scope of Work - Marking & Commissioning (M&C) Services

Tracking enhances the ability of VA to mitigate human factor concerns while ensuring world-class patient care and staff safety by providing assurances that instruments have been fully processed in accordance with regulatory guidelines and individual instrument manufacturer's Instructions for Use (IFU) for reusable medical equipment (RME) and dental/medical-surgical instrumentation.

The contractor shall provide the Marking & Commissioning (M&C) service which enhances the Sterile Processing Service (SPS) business processes and supports SPS staff responsible for tracking, cleaning and distributing reusable medical equipment throughout the medical facility by automating the traceability of tasks, instruments, and supplies. The following table contains SPS-specific requirements:

Req. ID	Requirement
MC001	The contractor shall review, provide constructive feedback, approve, and pre-populate the system with the site's medical/surgical and dental instrument data, providing access to the Censis Master Library as necessary for the effort.
MC002	The contractor shall ensure proper placement and application of 2D matrix mark by either electrochemical or manual (e.g. 2D matrix dot/tape) processes. Placement shall not impede clinician's use, nor subject any risk to the patient.
MC003	The contractor shall ensure QA of applied mark ensures that the matrix has scan capabilities by the Censitrac system within a maximum of three (3) seconds.
MC004	The contractor shall enter data into Censitrac dataset in strict accordance with the RTLS Sterile Processing Workflow (SPW) data standards (specifically DS018, DS019, and DS020); while qualifying as needed via the current version of <i>VA RTLS Medical-Surgical and Dental Instrument Nomenclature Guidance</i> .
MC005	The contractor shall create/provide tray count sheets utilizing 2D matrix scanning to readily identify instrument inventory of each set.
MC006	Commissioning QA: The contractors PM/technical staff shall analyze the data entries and apply VAs National Naming Convention/Data Standards and Data Quality Tool (DQT) to all the records, ensuring 100% compliance with the standards PRIOR to submission to VA for review/acceptance.

MC006.1	Data Quality Tool (DQT) new terms derived during the commissioning effort shall be submitted by the contractor to the VA COR/RTLS SPW Workgroup for processing and actions/approval within five (5) business days of cessation of M&C.
Req. ID	Requirement
MC006.2	The contractor shall provide any necessary data remediation within three (3) business days of receipt from VA.
MC007	The contractor shall provide at the close of each workday an e-report, capturing daily marking and commissioning activity for VA COR review.
MC008	The contractor shall meet regularly (not less than weekly) with the COR to present and review progress to date, discuss constraints, project schedule, consumables (stencils, etc.) on hand, availability of instruments, and estimate number/types of instruments remaining to be marked.

The contractor shall utilize the Censitrac software which serves as the VHA's nationwide surgical/medical and dental instrument inventory and workflow system. The contractor shall mark, fully commission all required data fields, and build instrument set count sheets as designated for assigned dental, medical-surgical instruments, and RME within each facility.

As part of this effort, the contractor shall conduct requisite site assessments, mark and commission instruments, perform quality assurance testing, perform data validation, and load data standard-compliant data into the new system.

1.3 Marking Methods for Instrument Tracking System (ITS) Application

Some VA Medical Centers (VAMCs) and Community Based Outpatient Clinics (CBOCs) are encountering challenges related to appropriate determination of approved methods for marking medical/surgical instruments upon implementation of the ITS application. Dental and Medical/Surgical instruments are capable of being marked to facilitate unique device identification, 'owner,' and applicable tray assignment. Instruments shall never be engraved or adulterated in any way that violates the protective passivation layer.

After performing an extensive review of marking methods, the Sterile Processing Workflow (SPW) Workgroup (WG) has determined that a goal of 100% instrument marking is not currently achievable due to a small subgroup of special surface characteristics (i.e. curved, knurled, titanium, etc.). Two primary methods were identified that meet the established National Program Office for Sterile Processing (NPOSP) goals:

1.3.1 Dimensional (2D) Data Matrix

The contractor shall use the GS1-standard format is an internationally recognized marking tool designed to be read by a handheld or fixed 'reader' integrated into the Instrument Tracking System (ITS). This VHA-standardized solution is suitable for workflow traceability and is currently being deployed to all VA Medical Centers as the primary (preferred/cost-effective) solution.

1.3.2 2D Data Matrix Instrument Marking Tape/ Dots

Any tape/dot utilized for this purpose shall be utilized in full accordance with Association for the Advancement of Medical Instrumentation (AAMI) guidelines and the manufacturer's instructions for use. The tape/dot matrix manufacturer's instructions shall be reviewed to verify which sterilants are capable of tape penetration, as not all types of tape/dot matrix may be used for all sterilization methods or for high-level disinfection.

NOTE: RME devices that lend themselves to the use of instrument tapes, dots, and/or radiofrequency identification (RFID) are those non-OR items that, due to special exceptions, are incapable of being marked with GS1-standard 2D data matrices, including but certainly not limited to the following RME:

- a. Comprised of Aluminum, Titanium, etc.
- b. Diamond or Linear Knurled Handles
- c. ENT/Neuro Instruments
- d. Rounded Items (e.g.: Dental, etc.)
- e. Small/Fine/Delicate Instruments

1.4 Beginning Instrument Marking and Commissioning

The contractor shall mark and commission approximately 100% of instrumentation, The COR and local SPS Chief will closely monitor the status of sets completed against lists provided to contractor.

Facilities will work closely with the contractor to ensure that as much instrumentation as possible is provided each day (typically a minimum of 200 instruments per marking team member per day). While operating room (OR) daily operational needs may exceed availability, the contractor(s) shall stay on schedule. Coordination between SPS, OR, CBOCs, Clinics, and contractor are essential to a successful deployment.

1.4.1 Matrix Estimations

The ITS contractor shall consider the following VA stencil estimation table, which was produced utilizing legacy ITS site data in 2013 and reaffirmed in late 2014:

VHA Medical Center Complexity Levels	Current Surgical Instrument Quantity Ranges (2014)	Recommended ITS Stencil Start Count*
1A	15,000-30,000	20,000
1B	13,000-20,000	15,000

1C	10,000-20,000	12,000
2	4,000-10,000	8,000
3	3,000-10,000	5,000

NOTE: * Facility is strongly encouraged to consider placing an additional order with sufficient lead time to maintain operations (30-day production time from date order is received by contractor)

1.4.2 Preliminary Activities

The facility count sheets will be provided by the facility for the contractor to review. Upon acceptance, contractor shall pre-load the Censitrac software with the site's reusable medical equipment (RME), medical/surgical, and dental instrument data and provide access to the library. This data will be utilized to commission items and subsequently produce Count Sheets for the Operating Room, CBOC's, and for other reporting purposes. Marking and commissioning may begin while count sheet preparations are underway.

1.5 INSTRUMENTATION NOMENCLATURE

Due to software constraints, the individual instrument descriptions in the Product Name fields are generally limited to 50 characters within Censitrac. The key data attributes shall adhere to the *VA RTLS Data Standards* (e.g. DS018, DS019, DS020) and the current version of *VA RTLS Medical-Surgical and Dental Instrument Nomenclature Guidance* (See Section 5). The following provides a general overview:

1. **Supplier:** Generally the Original Equipment Manufacturer (OEM) or primary U.S. contractor of the medical/surgical or dental instrumentation/device.
2. **Catalog Number:** This is the number electrochemically marked onto the side of the medical/surgical instrument by the original equipment manufacturer (OEM).
 - a. If this number is NOT present or legible, see below for guidance regarding the need for "priority replacement" of these items.
3. **Product Name:**
 - a. **Category:** General Instrument Classification (Ex: *Clamp, Grasper, Probe, Scissors, Tunneler, etc.*)
 - b. **Common Name:** Generally, the Brand/Trade Name derived from the inventing Surgeon/Creator (Ex: *Babcock, Castroviejo, DeBakey, Maryland, Mayo, etc.*)
 - c. **Primary/Secondary Descriptors:** General function of device and defining physical characteristics (Shape, Material, etc.)

- i. NOTE: A list of approved abbreviations for descriptors is available. The referenced abbreviations were developed to standardize the SPS capabilities required to meet the '50-character' limitation of the ITS Software.

- d. **Length-Dimension:** Generally, the length, weight, or primary identifying dimension(s) (e.g. Diameter, Gauge, French, etc.)

Please see the **VA RTLS Medical-Surgical and Dental Instrument Nomenclature Guidance** for additional reference which includes the approved abbreviations.

Items Not In Catalog with Known Manufacturer & Catalog/Reference Numbers

1. Enter Supplier Name
2. Enter Catalog Number
3. Enter description using the data standards and/or **VA RTLS Medical-Surgical and Dental Instrument Nomenclature Guidance** document.
 - a. **Product Name** field:
 - i. **Category:** General Instrument Classification
 - ii. **Common Name:** Generally, the Brand/Trade Name derived from the inventing Surgeon/Creator
 - a. Ex: *Clamp, Grasper, Probe, Scissors, Tunneler, etc.*
 - iv. **Primary/Secondary Descriptors:** General function of device and defining physical characteristics (Shape, Material, etc.)
 - a. Ex: *Babcock, Castroviejo, DeBakey, Maryland, Mayo, etc.*
 - b. **NOTE:** Please see the **VA RTLS Medical-Surgical and Dental Instrument Nomenclature Guidance** for additional reference, to include approved abbreviations. *The referenced abbreviations were developed to standardize the SPS capabilities required to meet the '50-character' limitation within OR Count Sheets in the Censitrac Software.*
 - v. **Length-Dimension:** Generally, the length or primary identifying dimension (Diameter, Gauge, French)

1.5.2 Items with Illegible or No Manufacturer or Catalog Numbers

Items that present without any easily identifiable marks (i.e. Catalog/Reference Number) will be considered for immediate removal and/or replacement by the facility.

1. Compliance with manufacturer's IFUs cannot be applied without 100% certainty of device identification.

2. Expedited replacement direction was provided directly to the VA RTLS PMO from the VHA National Program Office for Sterile Processing (NPOSP).
3. If a suitable backup instrument is available, the unmarked instrument shall be expeditiously programmed for replacement.
4. Any critically required 'no-mark' instruments (those items without which will adversely impact the delivery of quality patient care) may be retained for use while a replacement is urgently procured.

- a. This includes any floor grade (e.g. 'Pakistani') instrumentation that is identified within OR surgical trays.

NOTE: VA's goal is to remove medical/surgical and dental instruments from service that present without any readable OEM surface markings. Through the course of the day based on the discovery of an illegible manufacturer/part number, the contractor shall clearly communicate and provide VA with medical/surgical and dental instruments which require decision and/or action by SPS personnel. The enhanced process steps are as follows:

1. All medical/surgical and dental instruments that meet the criteria (e.g. material and size requirements) for marking shall be 2D electrochemically marked and commissioned. The standards for the key data entry fields and are as follows:
2. **Supplier** field:
 - a. If the Original Equipment Manufacturer (OEM) cannot be readily determined, HPES/Sites shall utilize "**NCN**" (No Contractor Name)
3. **Catalog Number** field:
 - b. If the Catalog Number cannot be readily determined, HPES/Sites shall utilize "**NMN**" (No Model Number) plus
 - c. After entering 'NMN' will Barcode Scan the 10-digit Stencil ID into the '**Catalog Number**' Field
 - d. Result: (example) "**NMN1234567890**"
4. These values shall be utilized to ensure adherence to the data standards, limiting human factors related to data entry, and to assist in reporting purposes while procuring a replacement.
 - a. Facility SPS Chief will utilize the 'NVM' and 'NMN' references to monitor the expedited replacement and for required NPOSP reporting purposes.
 - b. DXC Technologies/Censis shall ensure that reporting of "Same Stencil ID & Catalog Number" is an established report available to the VISN and the local SPS Chief upon activation of the software.

5. All medical/surgical and dental instruments that were marked per the above procedure without a legible supplier or part number shall be sequestered (e.g. bagged) and placed back into its respective tray/set. SPS staff shall be notified to determine which medical/surgical and dental instruments should be considered for decommissioning and/or replacement. SPS will review the affected medical/surgical and dental instruments and take any necessary actions in accordance with the established expectations.

1.6 Data Quality and Reporting

These requirements dictate that marked instruments will be 100% accurately identified by the contractor (not VA SPS staff), data entered (also known as 'commissioned') into the Censitrac database, with all necessary quality controls in place to meet VA's nomenclature standards and guidance (See Section 5).

- x The Contractor will follow the following process for physical (mark) quality and item identification assurance.
 - o Post 2D electrochemical mark applications, the contractor will immediately QA the item to ensure it scans easily into the Censitrac system. Marks that do not read within 2-3 seconds will be assessed for re-application prior to commissioning.
 - o VA SPS staff will perform QA on the contractor-performed work on a Censitrac workstation, which permits access to the instrument database. This access will allow VA staff to evaluate the quality of the mark and that the instrument scanned is the one displayed in Censitrac and the data is in strict accordance with VA Data Standards. It's important that the standardized product name corresponds to the instrument being scanned. The QA of the instrument name is described below.
 - o QA will be performed by the contractor in accordance with the following schedule:
 - Weeks 1-2: The facility/site SPS staff will perform manual and automated QA checks on not less than 15% of contractor throughput of medical/surgical instrumentation, containers, and applicable RME. The checks must be annotated and forwarded to the Contracting Officer Representative (COR) daily.
 - Weeks 3+: The facility SPS staff will perform manual and automated QA checks on not less than 10% of contractor throughput of medical/surgical instrumentation, containers, and applicable RME. The QA checks shall be annotated and forwarded to the COR weekly for the remainder of the contract.
 - o The QA effort will be recorded and submitted to the COR in an electronic format since aggregate results will need to be analyzed to measure contractor performance. The QA document will be reviewed by the VA SPS POC and submitted to the COR daily/weekly per the above requirements.

- The VISN COR will aggregate and act upon contractor QA results as necessary to measure contractor performance and ensure VA receives product deliverable in full applicability to these requirements.
- Both VA and the contractor will continue to monitor and improve upon these activities.
- x Upon marking and commissioning of a site's instruments, the contractor shall provide a consolidated list to the facility for review, to include any 'new' Data Quality Tool (DQT) (described in section 6.3) reference table terms which will be reviewed by the VA team. The QA list shall be available to the VA for review/processing within 48 hours after each day's marking and commissioning activities. The VA shall be able to perform up to 100% quality assurance checks on the instrument names.

1.6.1 New Terms

The VA has developed the aforementioned Data Quality Tool to provide enterprise assurances that all data added to a new Censitrac system meets the conventional data standards as described within the current version of the *VA RTLS Medical-Surgical and Dental Instrument Nomenclature Guidance*.

- 1) Contractor shall access the most recent DQT from the RTLS SharePoint or upon request from the COR.
- 2) The contractor shall follow the DQT directions to load the new site's data for quality testing.
- 3) Any errors shall be reviewed/corrected by the contractor.
- 4) For outstanding errors that cannot be immediately remediated by the contractor, or are otherwise known 'new' terms that need to be evaluated, these shall be saved within the DQT and forwarded to the VA COR for processing by the VA RTLS SPW Workgroup.
- 5) Upon receipt of VA feedback/approval – contractor shall load the approved terms to the DQT Reference Table and provide any necessary data remediation within three (3) business days of receipt from VA.
- 6) The revised DQT (Master) shall be returned to VA COR/SPW WG and/or uploaded by contractor to the VA SharePoint.
- 7) DXC Technology will submit the final VISN SPW Data document (in DQT format) to the COR for local approval
 - a. Contractor will do this at no additional charge to VA as QA is an inherent function of the commissioning charge.
 - b. VA retains all rights to the DQT and its future use beyond the contractor's contract Period of Performance (POP).

1.7 Additional Requirements

o The contractor shall be certified by Censis indicating appropriate training and quality control for marking and commissioning services. Contractor certification by Censis may require costs to the contractor associated with any certification process. o Stencils may be acquired from Censis using the unique numbering system developed for and/or partially implemented at each VA facility. o The contractor shall provide unique stencil numbers. The solution shall not allow duplicate numbers within the entire VA system. VA currently utilizes an alphanumeric nomenclature to identify their assets and instruments (example: 528A4-EE12345, where “528A4” is the station number and “123456” is the unique identification number for the instrument). The list of facilities under this scope is provided on the following SharePoint site, with their designated station numbers, which can be used to populate the table in Section 6:

https://vaww.vha.vaco.portal.va.gov/sites/DUSHOM/HTM/RTLS/Lists/Facility_Directory/All%20Items.aspx

o The contractor shall coordinate access to instruments for marking and commissioning with the Sterile Processing Service (SPS) Chief at each facility, in such a manner as to minimize disruption to patient care and to minimize the period of time required to complete marking and commissioning. The contractor shall schedule any necessary work during timeframes when the items are in less demand by the OR, Clinics, etc., to include evenings, nights, and/or weekends (as applicable). Coordination between SPS, Operating Room (OR), Community Based Outpatient Clinics (CBOC), and Hospital based clinical departments (from here on known as Clinics), and the Contractor is essential to a successful deployment. VA facilities are prepared to monitor and strategically plan around the “OR Block” and clinic treatment schedules to most efficiently permit the contractor access to medical/surgical and dental instruments while not impacting patient care. **The contractor is hereby clearly informed by VA that the work to be performed may NOT be possible during normal business hours.**

o Instruments shall be marked with the appropriate Censitrac marking workstation and consumables supplied by the successful contractor. The Contractor shall allocate its own resources at some facilities that do not currently have electrochemical marking workstations in place.

o Upon approval, the new terms will be added to the DQT reference tables per the process outlined below:

o The contractor shall prepare all SPW data in strict accordance with VA RTLS Data Standard 020 (Section 5) and will forward any concerns to the COR.

o The contractor shall propose any new marking terms to the COR for review/approval within 5 business days of completion of instrument marking at the VA facility.

- o The COR will provide concurrence or feedback via email on items to be addressed/clarified by the contractor within 5 business days. For specific items to be addressed by contractor, the contractor shall resubmit responses within 48 hours to those items in questions for VA concurrence as applicable.
- o The Contractor shall update the data quality tool reference tables with the newly accepted marking terms for VA use.
- o When all the initial errors have been addressed and new terms accepted into use, the contractor shall submit facility data to each COR for acceptance of instrument marking data.
 - o All errors will be returned to contractor for correction. The contractor shall resubmit the facility data with the corrections addressed. The COR shall be presented with error-free data for consideration of acceptance.
 - o CORs will use the VA data quality tool to validate contractor-submitted data is in full compliance with DS020.
- x VA COR will provide written concurrence to formally accept the facility instrument marking data within 5 business days.
- x The COR will begin considerations of the SPS Marking activities to be nearing completion/goal(s) when facilities are unable to provide any additional items to be marked and/or commissioned. These discussions will occur after facilities have determined available instrument sets have been marked and commissioned along with the majority of loose instrument (e.g. backup) inventory.
- x Considering the exact number of medical/surgical and dental instruments to be marked and commissioned at each site is currently unknown, the following metric has been agreed upon by VA to trigger dialogue surrounding activities related to contractual completion of the marking and commissioning activities. The contractor routinely captures daily marking and commissioning activity which are reported to the COR or their designee. The “Number of Instruments Marked/Commissioned” is recorded daily during the lifespan of the project and routinely trended by the COR. When the “Number of Instruments Marked/Commissioned” metric’s daily output falls below 70% of the trended average, the COR and Contractor will discuss determining an agreeable completion date.

The following table provides the number of estimated instruments requiring marking and commissioning by facility and the date work should be completed:

VISN	Location	Estimated Number of Instruments	Task End Date
16	Alexandria, LA	12,000	11/16/2017

Table 1: Estimated Number of Instruments for Marking x The contractor shall work with the local SPS Chief to determine a location at each site that will be provided for contractor storage and work space. Contractor shall NOT store, or plan to store, any hardware/materials in the SPS operational work areas. All materials

such as tools, packaged products, personal effects, etc. of the contractor shall be located in the centralized contractor location.

- **NOTE:** Due to the high risk of human factor/workflow non-compliance, ALL marking of Medical-Surgical & Dental Instruments will be completed OUTSIDE of any SPS working area. Marking may be accomplished in an SPS administrative area, so long as it is not directly contained or openly connected with an SPS decontamination, reprocessing, assembly, or storage area.
- Scheduling of the marking and commissioning services shall be coordinated with the SPS Chief at each site.

No legal liability on the part of the Government for any payment may arise for performance under this contract beyond 08-31-2018, until funds are made available to the Contracting Officer for performance and until the Contractor receives notice of availability, to be confirmed in writing by the Contracting Officer.

(a) *North American Industry Classification System (NAICS) code and small business size standard.*

The NAICS code and small business size standard for this acquisition appear in Block 10 of the solicitation cover sheet (SF 1449). However, the small business size standard for a concern which submits an offer in its own name, but which proposes to furnish an item which it did not itself manufacture, is 500 employees.

(b) *Submission of offers.* Submit signed and dated offers to the office specified in this solicitation at or before the exact time specified in this solicitation. Offers may be submitted on the SF 1449, letterhead stationery, or as otherwise specified in the solicitation. As a minimum, offers must show—

- (1) The solicitation number;
- (2) The time specified in the solicitation for receipt of offers;
- (3) The name, address, and telephone number of the offeror;
- (4) A technical description of the items being offered in sufficient detail to evaluate compliance with the requirements in the solicitation. This may include product literature, or other documents, if necessary;
- (5) Terms of any express warranty;
- (6) Price and any discount terms;
- (7) "Remit to" address, if different than mailing address;
- (8) A completed copy of the representations and certifications at FAR 52.212-3 (see FAR 52.212-3(b) for those representations and certifications that the offeror shall complete electronically);
- (9) Acknowledgment of Solicitation Amendments;
- (10) Past performance information, when included as an evaluation factor, to include recent and relevant contracts for the same or similar items and other references (including contract numbers, points of contact with telephone numbers and other relevant information); and
- (11) If the offer is not submitted on the SF 1449, include a statement specifying the extent of agreement with all terms, conditions, and provisions included in the solicitation. Offers that fail to furnish required representations or information, or reject the terms and conditions of the solicitation may be excluded from consideration.

- (c) *Period for acceptance of offers.* The offeror agrees to hold the prices in its offer firm for 30 calendar days from the date specified for receipt of offers, unless another time period is specified in an addendum to the solicitation.
- (d) *Product samples.* When required by the solicitation, product samples shall be submitted at or prior to the time specified for receipt of offers. Unless otherwise specified in this solicitation, these samples shall be submitted at no expense to the Government, and returned at the sender's request and expense, unless they are destroyed during preaward testing.
- (e) *Multiple offers.* Offerors are encouraged to submit multiple offers presenting alternative terms and conditions, including alternative line items (provided that the alternative line items are consistent with subpart 4.10 of the Federal Acquisition Regulation), or alternative commercial items for satisfying the requirements of this solicitation. Each offer submitted will be evaluated separately.
- (f) Late submissions, modifications, revisions, and withdrawals of offers.
- (1) Offerors are responsible for submitting offers, and any modifications, revisions, or withdrawals, so as to reach the Government office designated in the solicitation by the time specified in the solicitation. If no time is specified in the solicitation, the time for receipt is 4:30 p.m., local time, for the designated Government office on the date that offers or revisions are due.
- (2)(i) Any offer, modification, revision, or withdrawal of an offer received at the Government office designated in the solicitation after the exact time specified for receipt of offers is "late" and will not be considered unless it is received before award is made, the Contracting Officer determines that accepting the late offer would not unduly delay the acquisition; and—
- (A) If it was transmitted through an electronic commerce method authorized by the solicitation, it was received at the initial point of entry to the Government infrastructure not later than 5:00 p.m. one working day prior to the date specified for receipt of offers; or
- (B) There is acceptable evidence to establish that it was received at the Government installation designated for receipt of offers and was under the Government's control prior to the time set for receipt of offers; or
- (C) If this solicitation is a request for proposals, it was the only proposal received.
- (ii) However, a late modification of an otherwise successful offer, that makes its terms more favorable to the Government, will be considered at any time it is received and may be accepted.
- (3) Acceptable evidence to establish the time of receipt at the Government installation includes the time/date stamp of that installation on the offer wrapper, other documentary evidence of receipt maintained by the installation, or oral testimony or statements of Government personnel.
- (4) If an emergency or unanticipated event interrupts normal Government processes so that offers cannot be received at the Government office designated for receipt of offers by the exact time specified in the solicitation, and urgent Government requirements preclude amendment of the solicitation or other notice of an extension of the closing date, the time specified for receipt of offers will be deemed

to be extended to the same time of day specified in the solicitation on the first work day on which normal Government processes resume.

(5) Offers may be withdrawn by written notice received at any time before the exact time set for receipt of offers. Oral offers in response to oral solicitations may be withdrawn orally. If the solicitation authorizes facsimile offers, offers may be withdrawn via facsimile received at any time before the exact time set for receipt of offers, subject to the conditions specified in the solicitation concerning facsimile offers. An offer may be withdrawn in person by an offeror or its authorized representative if, before the exact time set for receipt of offers, the identity of the person requesting withdrawal is established and the person signs a receipt for the offer.

(g) *Contract award (not applicable to Invitation for Bids).* The Government intends to evaluate offers and award a contract without discussions with offerors. Therefore, the offeror's initial offer should contain the offeror's best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if later determined by the Contracting Officer to be necessary. The Government may reject any or all offers if such action is in the public interest; accept other than the lowest offer; and waive informalities and minor irregularities in offers received.

(h) *Multiple awards.* The Government may accept any item or group of items of an offer, unless the offeror qualifies the offer by specific limitations. Unless otherwise provided in the Schedule, offers may not be submitted for quantities less than those specified. The Government reserves the right to make an award on any item for a quantity less than the quantity offered, at the unit prices offered, unless the offeror specifies otherwise in the offer.

(1) ☐ Are, ☐ are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) ☐ Have, ☐ have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3) ☐ Are, ☐ are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) ☐ Have, ☐ have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,500 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) *The tax liability is finally determined.* The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples.*

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. Sec. 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. Sec. 6320 entitling the taxpayer to request a hearing with

the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. Sec. 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

On the basis of those efforts, the offeror certifies that it is not aware of any such use of child labor.

(2) ☐ Outside the United States.

(k) *Certificates regarding exemptions from the application of the Service Contract Labor Standards.* (Certification by the offeror as to its compliance with respect to the contract also constitutes its certification as to compliance by its subcontractor if it subcontracts out the exempt services.)

☐ (1) Maintenance, calibration, or repair of certain equipment as described in FAR 22.1003-4(c)(1). The offeror ☐ does ☐ does not certify that—
