☐ An urgent and compelling need exists, and following the ordering procedures would result in unacceptable delays.

☒ Only one source can provide the supplies or services required at the level of quality required because the supplies or services are unique or highly specialized;

Genomic Health. The diagnostic use of these tests or assays is based on methods, reference ranges and physician input. It would not be clinically appropriate to change reference ranges and methods each year. Furthermore, the process of changing tests, ranges, methods, LOINC codes in the VISTA Lab package annually would create an administrative burden (and cost) that would exceed the potential cost savings from changing reference labs. Also, any changes in VISTA requires changes in Computerized Patient Record System CPRS because of the way the profiles/tests are packaged uniquely by Service
